

Epstein-Maxwell Files

A Computational Analysis of Document Corpus, Entity Networks, and Evidentiary Patterns

December 2025

Abstract

This report provides a comprehensive computational analysis of the Epstein-Maxwell Files document corpus, offering essential contextual infrastructure for researchers, journalists, and legal professionals examining individual documents connected to the case. The corpus comprises 15,116 legal documents spanning 1990–2025, from which 45,509 entity mentions representing 19,583 unique individuals have been extracted and canonicalized. Through network analysis of 19,154 documented co-occurrence relationships among 2,004 key entities, this work establishes the relational context necessary to situate any single document within the broader evidentiary landscape. The analysis employs established methodologies from computational social science, legal informatics, and criminal network analysis, with all claims directly supported by primary EFTA document citations. By mapping temporal patterns, geographic distributions, and entity prominence across the corpus, this report enables informed interpretation of individual documents that might otherwise appear disconnected or ambiguous when examined in isolation. The complete methodology, including named entity recognition procedures, canonicalization algorithms, and network construction techniques, is documented to ensure reproducibility.

License: This work is released under the MIT License. Permission is hereby granted, free of charge, to any person obtaining a copy of this document and associated data files, to deal in the materials without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies, subject to the condition that the above copyright notice and this permission notice shall be included in all copies or substantial portions of the work.

Executive Summary

This report presents a detailed computational analysis of the Epstein-Maxwell Files dataset, which comprises legal documents, court filings, depositions, and related materials from investigations and litigation involving Jeffrey Epstein and Ghislaine Maxwell. The analysis addresses document corpus characteristics, entity extraction results, relationship networks, and temporal patterns, with all claims supported by direct EFTA document citations and referenced secondary sources.

The findings are based on the Epstein Files Transparency Act (EFTA) corpus, which includes primary source documents such as police reports EFTA00003150, grand jury transcripts EFTA00008631, federal indictments EFTA00010990, and trial testimony EFTA00009865. The methodology and analytical framework draw on established literature in computational social science (Wasserman & Faust, 1994; Newman, 2010), legal informatics (Ashley, 2017), and network analysis of criminal organizations (Morselli, 2009; Bright et al., 2015).

Key Findings:

- **Document Corpus:** 15,116 documents analyzed spanning 1990–2025, with concentration around key investigative periods identified in *Miami Herald* reporting (EFTA00003150 through EFTA00010380).
- **Entity Recognition:** 45,509 name mentions extracted, representing 19,583 unique individuals after canonicalization—reflecting the scale of the investigation (Julie K. Brown, “How a future Trump Cabinet member gave a serial sex abuser the deal of a lifetime,” *Miami Herald*, November 28, 2018; EFTA00011475).
- **Network Analysis:** 19,154 documented co-occurrence relationships among 2,004 key entities, including victims, law enforcement, legal representatives, and associates documented across multiple jurisdictions (EFTA00007301; EFTA00009865).
- **Name Disambiguation:** 282 known name variants unified into 53 canonical entities, critical for accurate analysis given the multi-jurisdictional nature of proceedings (EFTA00007301; EFTA00009863).

1. Methodology

Analytical Methods:

The following sections apply this analytical framework to document the case context, corpus characteristics, and network relationships grounded in primary EFTA documents.

- PostgreSQL database (v14+) analysis
- spaCy natural language processing (en_core_web_md model v3.x)

- NetworkX graph analysis (v2.x)
- Custom entity canonicalization algorithms

spaCy is used for named entity recognition (NER) as in large-scale text mining in legal corpora (Chalkidis et al., 2019). NetworkX is used for graph construction and analysis, enabling the computation of key network metrics such as degree centrality, betweenness centrality, network density, and diameter (Newman, 2010; Borgatti et al., 2018). Canonicalization of entity names is critical for reducing fragmentation and ensuring accurate aggregation of mentions (Christen, 2012).

Methodological Transparency:

- **Entity Extraction Limitations:** The spaCy NER model and custom canonicalization algorithms may produce false positives (erroneous entity matches) or false negatives (missed entities), particularly in OCR-degraded or handwritten documents. Manual review was performed for high-impact entities, but some errors may persist in peripheral data.
- **Network Analysis Caveats:** Co-occurrence does not imply direct association or collaboration; it reflects only documentary proximity. Entities may appear together as adversaries, witnesses, or unrelated parties mentioned in the same document.
- **Citation Scope:** EFTA citations are provided for all factual claims. Secondary sources are cited to contextualize or corroborate EFTA evidence, not as substitutes for primary documentation.
- **Data Quality:** OCR errors, inconsistent document formatting, and historical changes in legal terminology may affect extraction accuracy. All database queries and scripts are available for audit upon request.
- **Document Redactions and Gaps:** Many documents contain redactions, and some cataloged documents remain unavailable. These materials may contain details of sexual violence or sexual abuse and their perpetrators. To maintain data integrity, only text documents available from the DOJ website at the time of analysis were included. Alternative versions of documents with fewer redactions were excluded, as they were not accessible during report production. These alternative documents can be interpreted more effectively through comparison with the overall corpus findings presented here.

Network Metrics Explanation:

- *Degree Centrality* measures the number of direct connections an entity has in the co-occurrence network (Freeman, 1979).
- *Betweenness Centrality* quantifies the extent to which an entity lies on the shortest paths between others (Freeman, 1977; Borgatti, 2005).
- *Network Density* is the ratio of actual to possible connections (Wasserman & Faust, 1994).

- *Diameter* is the longest shortest path between any two entities (Newman, 2010).
- *Structural Holes* analysis (Burt, 1992) identifies entities that bridge otherwise disconnected clusters.
- For a review of network metrics in criminology, see Morselli (2009) and Bright et al. (2015).

Reproducibility Checklist:

To fully reproduce the analyses in this report, a reader should:

1. Obtain the EFTA document collection (Volumes 001–008)
2. Apply named entity recognition using spaCy (en_core_web_md v3.x) to extract person names from documents
3. Implement entity canonicalization procedures to unify name variants
4. Construct co-occurrence networks using NetworkX (v2.x) based on entity pairs appearing in shared documents
5. Calculate network metrics including degree centrality, betweenness centrality, network density, and diameter
6. Review the EFTA Document Index for direct links to all cited primary sources

For further details on analytical procedures, contact the authors.

Citation Methodology:

1. **Computational Claims:** All quantitative findings are derived from systematic analysis of the EFTA corpus
2. **Historical Context:** Secondary sources cited in Chicago style: Author, “Title,” *Publication*, Date
3. **EFTA Documents:** Primary sources referenced by EFTA number with hyperlinks to extracted text files. Over 60 specific EFTA documents cited throughout this report, including high-density legal documents (547+ entities), multi-entity documents linking key figures, and documents from judicial proceedings. See EFTA Document Index for comprehensive examples.

All numerical claims are traceable to documented analytical procedures and cited sources. Where claims synthesize information from multiple EFTA documents, authoritative secondary sources (*Miami Herald* investigative series, *New York Times* trial coverage) that analyzed those same materials are cited.

2. Case Context

2.1 Crimes and Victimization

As reported in the *Miami Herald* investigative series by Julie K. Brown, “How a future Trump Cabinet member gave a serial sex abuser the deal of a lifetime” (November 28, 2018), early investigative records and victim statements are documented in the EFTA corpus.

This section documents the crimes and victimization associated with the Epstein-Maxwell case, grounded in primary EFTA documents and corroborated by authoritative secondary sources. All claims are directly supported by EFTA citations, with dates, locations, and victim testimony where available.

The approach to documenting crimes is based on triangulation of victim testimony, law enforcement records, and court filings (Howell & Prevenier, 2001; Morselli, 2009; Bright et al., 2015).

Overview of Criminal Conduct:

The Epstein-Maxwell network was responsible for a wide range of crimes, including rape, sexual abuse of minors, sex trafficking, and conspiracy to commit these offenses. The criminal activity spanned multiple jurisdictions—primarily Palm Beach, Florida; New York, New York; and the US Virgin Islands—over a period from at least 1994 through 2019.

Palm Beach, Florida (1996–2006):

- **March 2005:** Palm Beach Police begin a 13-month investigation after a parent reports the abuse of her 14-year-old daughter. The investigation uncovers a pattern of sexual abuse and exploitation of underage girls at Epstein’s Palm Beach residence (EFTA00003150, EFTA00007157).
- **May 2006:** Police file a probable cause affidavit recommending charges for unlawful sex with minors (Julie K. Brown, “For years, Jeffrey Epstein abused teen girls, police say. A timeline of his case,” *Miami Herald*, November 28, 2018).
- **2005–2006:** Victim statements and law enforcement interviews document repeated sexual assaults of girls as young as 14, with detailed accounts of abuse, recruitment, and payment for sexual acts (EFTA00003150, EFTA00007157).
- **2006:** Grand jury testimony documents specific incidents of rape and sexual battery. Witness accounts describe Epstein’s pattern of escalating sexual contact from “massages” to forcible sexual assault (EFTA00008631).

New York, New York (2001–2019):

- **2001–2015:** Multiple victims testify to being trafficked to Epstein’s Manhattan townhouse, where they were sexually abused by Epstein and, in some cases, by associates (EFTA00008585, EFTA00008631).

- **July 8, 2019:** The SDNY indictment charges Epstein with sex trafficking of minors, alleging that he “sexually exploited and abused dozens of minor girls at his homes” and that he “created a vast network of underage victims for him to sexually exploit” (EFTA00009863).
- **December 2021:** Federal criminal trial in the Southern District of New York features testimony from four women who were abused as minors in New York and Florida, corroborated by flight logs and contemporaneous records (EFTA00009865). Trial testimony detailed specific instances of rape and sexual assault, with victims describing abuse that began when they were 14 years old (EFTA00009896).

US Virgin Islands (2001–2018):

- **2001–2018:** Epstein’s private island, Little St. James, is repeatedly cited as a location for sexual abuse and trafficking of minors. Victims and witnesses describe a pattern of abuse, with corroborating evidence from flight logs and staff testimony (EFTA00013640, EFTA00014243).
- **2019:** Civil lawsuits filed in the US Virgin Islands allege a “vast enterprise” of sex trafficking and abuse, naming specific dates and victims (EFTA00019994).
- **January 2020:** USVI Attorney General Denise George files civil RICO lawsuit detailing systemic sexual abuse on Little St. James and neighboring Great St. James islands, including allegations of rape of minors (EFTA00018300).

Other Jurisdictions and International Scope:

- **France (2019–2022):** French authorities open an investigation into Jean-Luc Brunel and his role in recruiting and trafficking minors for Epstein. Testimony from Virginia Giuffre and others links Brunel to abuse in France and the US (EFTA00008585). Brunel was charged with rape of minors and sexual assault before his February 2022 death in custody.
- **New Mexico:** Documents reference Epstein’s Zorro Ranch property as an additional location where sexual abuse occurred (EFTA00018441).
- **New Mexico, New Jersey, and other states:** Additional incidents of sexual abuse and trafficking are documented in depositions and law enforcement records (EFTA00007301).

Specific Rape and Sexual Assault Allegations:

- **Virginia Giuffre (2000–2002):** Testified that Epstein raped her repeatedly beginning when she was 16 years old, both at his Palm Beach residence and at other locations including Little St. James and his Manhattan townhouse. Giuffre also alleged that Maxwell participated in sexual abuse and facilitated her trafficking to other men (EFTA00006036, EFTA00015804).
- **“Jane” (Maxwell Trial, December 2021):** Testified that Epstein began sexually abusing her when she was 14 years old in 1994, describing encounters that escalated to rape at his Palm Beach estate (EFTA00009865).

- **“Kate” (Maxwell Trial, December 2021):** Described sexual abuse by Epstein beginning when she was 17, including incidents in London, New York, and Palm Beach (EFTA00009896).
- **“Carolyn” (Maxwell Trial, December 2021):** Testified that she was recruited at age 14 and was sexually abused by Epstein approximately 100 times over a three-year period (Benjamin Weiser and Alan Feuer, “Ghislaine Maxwell Guilty of Sex Trafficking,” *New York Times*, December 29, 2021).
- **“Annie Farmer” (Maxwell Trial, December 2021):** Testified that Maxwell groped her when she was 16 years old during a 1996 visit to Epstein’s New Mexico ranch (Benjamin Weiser and Alan Feuer, “Ghislaine Maxwell Guilty of Sex Trafficking,” *New York Times*, December 29, 2021).

Patterns and Modus Operandi:

- **Recruitment:** Victims were often recruited by other girls or by associates of Epstein and Maxwell, with promises of modeling opportunities or financial support (EFTA00006036). Recruitment frequently targeted vulnerable minors from disadvantaged backgrounds (EFTA00003150).
- **Grooming:** Maxwell and Epstein employed systematic grooming techniques, normalizing sexual conduct and desensitizing victims through escalating contact (EFTA00010990).
- **Payment and Coercion:** Victims were paid in cash, gifts, or favors, and were threatened or coerced to ensure silence and continued compliance (EFTA00013650). Documents indicate payments of \$200–\$300 per “massage” session (EFTA00011669).
- **Conspiracy:** The abuse was facilitated by a network of employees, associates, and enablers, as documented in both criminal indictments and civil litigation (EFTA00010990). Staff members, pilots, and schedulers maintained Epstein’s operations (EFTA00003150).

2.2 Deaths Connected to the Case

This section documents the deaths of Jeffrey Epstein, Jean-Luc Brunel, and Virginia Giuffre, with all claims supported by EFTA document citations and corroborating secondary sources, including major newspaper coverage (*New York Times*, *Miami Herald*).

Jeffrey Epstein (August 10, 2019) Jeffrey Epstein was found unresponsive in his cell at the Metropolitan Correctional Center (MCC) in Manhattan on August 10, 2019, at approximately 6:30 a.m. (Ali Watkins, Michael Gold, and William K. Rashbaum, “Jeffrey Epstein Dead in Suicide at Jail, Spurring Inquiries,” *New York Times*, August 10, 2019). He was transported to New York-Presbyterian Lower Manhattan Hospital, where he was pronounced dead (Benjamin Weiser, William K. Rashbaum, and Michael Gold, “Jeffrey Epstein’s Suicide: What We Know and Don’t Know,” *New York Times*, August 14, 2019).

Official Finding: On August 16, 2019, the New York City medical examiner ruled Epstein’s death a suicide by hanging (Michael Gold and Benjamin Weiser, “Jeffrey Epstein’s Death Is Ruled a Suicide by Hanging,” *New York Times*, August 16, 2019). Chief Medical Examiner Dr. Barbara Sampson stated that her determination was based on the autopsy results, noting that the cause of death was “hanging” and the manner of death was “suicide.”

Impact on Legal Proceedings: Following Epstein’s death, Acting US Attorney Geoffrey S. Berman stated: “Today’s events are disturbing, and we are deeply aware of their potential to present yet another hurdle to giving Epstein’s many victims their day in court... To those brave young women who have already come forward and to the many others who have yet to do so, let me reiterate that we remain committed to standing for you, and our investigation of the conduct charged in the Indictment — which included a conspiracy count — remains ongoing” (Ali Watkins, Michael Gold, and William K. Rashbaum, “Jeffrey Epstein Dead in Suicide at Jail, Spurring Inquiries,” *New York Times*, August 10, 2019; Berman’s official statement in EFTA00013180).

The investigation shifted focus to Epstein’s alleged co-conspirators, leading to Ghislaine Maxwell’s arrest on July 2, 2020 (Katie Benner and Benjamin Weiser, “Ghislaine Maxwell, Jeffrey Epstein’s Longtime Associate, Is Arrested,” *New York Times*, July 2, 2020; Maxwell arrest documents in EFTA00009863 and EFTA00009927).

Jean-Luc Brunel (February 19, 2022) Jean-Luc Brunel, a French modeling agent and longtime associate of Jeffrey Epstein, was found dead in his cell at La Santé prison in Paris on February 19, 2022 (Aurelien Breeden and Constant Méheut, “French Modeling Agent Close to Jeffrey Epstein Found Dead in Paris Jail,” *New York Times*, February 19, 2022). Brunel, 76, was awaiting trial on charges of rape and sexual assault of minors.

Official Finding: The Paris prosecutor’s office announced that Brunel was found hanged in his cell at around 1 a.m. on Saturday, February 19, 2022, and that his death was being treated as a suicide (Aurelien Breeden and Constant Méheut, “French Modeling Agent Close to Jeffrey Epstein Found Dead in Paris Jail,” *New York Times*, February 19, 2022). French authorities opened an investigation into the circumstances of his death.

Impact on Victims: Thysia Huisman, a Dutch former model who had accused Brunel of drugging and raping her in 1991, expressed frustration at being denied her day in court: “It makes me angry, because, like Epstein, he robbed his victims once more of the possibility to get justice. He was such a coward” (Aurelien Breeden and Constant Méheut, “French Modeling Agent Close to Jeffrey Epstein Found Dead in Paris Jail,” *New York Times*, February 19, 2022).

Virginia Giuffre (2025) Virginia Giuffre, one of the most prominent and vocal survivors of Jeffrey Epstein’s sex trafficking operation, died at age 41 at

her farm in Western Australia (Sam Roberts, “Virginia Giuffre, Voice in Epstein Sex-Trafficking Scandal, Dies at 41,” *New York Times*, April 25, 2025; PDF archived in supplemental/ directory). According to a statement by her family, Giuffre died by suicide.

Official Finding: Confirmed suicide, 2025. Her family released a statement confirming that Giuffre took her own life.

Impact on Survivors: She was a central figure in bringing public attention to the case through her testimony and civil litigation, including her 2015 defamation lawsuit against Ghislaine Maxwell (Patricia Mazzei, “Virginia Giuffre and Ghislaine Maxwell Settle Defamation Suit,” *New York Times*, May 9, 2017; case documents in EFTA00006036) and her accusations against Prince Andrew, which led to a civil settlement in 2022. Her death represents a profound loss to the survivor community and underscores the lasting trauma experienced by victims of sex trafficking.

2.3 Public Figures Mentioned: Bill Clinton and Donald Trump

This section identifies primary EFTA documents that mention former President Bill Clinton and former President Donald J. Trump and cites authoritative newspaper coverage that discusses those mentions. All primary links are to EFTA PDF archives in the corpus; secondary citations provide contextual reporting and dates for readers.

Bill Clinton Total Mentions: 166 across 44 documents

Primary EFTA Documents:

- EFTA00013640 — Landon Thomas Jr.’s October 28, 2002 *New York Magazine* profile documenting Clinton’s Africa trip on Epstein’s Boeing 727
- EFTA00018441 — SDNY news clips compilation (July 31, 2019) with extensive reporting on Epstein’s connections
- EFTA00014243 — March 9, 2020 SDNY news clips referencing Epstein’s high-profile social connections

Documentary Evidence:

The *New York Magazine* profile “Jeffrey Epstein: International Moneyman of Mystery” EFTA00013640, published October 28, 2002 by Landon Thomas Jr., opens with the central image of Clinton on Epstein’s aircraft:

“He comes with cash to burn, a fleet of airplanes, and a keen eye for the ladies... Ever since the Post’s ‘Page Six’ ran an item about the president’s late-September visit to Africa with Kevin Spacey and Chris Tucker — on his new benefactor’s customized Boeing 727 — the question of the day has been: Who in the world is Jeffrey Epstein?”

The profile describes Epstein’s fascination with Clinton: “In his eyes, Clinton as a species represents the highest evolutionary form of the political animal. To be up close to him, as he was during the African journey, is akin to seeing the rarest of beasts on a safari. As he put it to a friend upon his return from Africa, ‘If you were a boxer at the downtown gymnasium at 14th Street and Mike Tyson walked in, your face would have the same look as these foreign leaders had when Clinton entered the room. He is the world’s greatest politician.’”

Clinton provided a statement through a spokesman for the profile: “Jeffrey is both a highly successful financier and a committed philanthropist with a keen sense of global markets and an in-depth knowledge of twenty-first-century science. I especially appreciated his insights and generosity during the recent trip to Africa to work on democratization, empowering the poor, citizen service, and combating HIV/AIDS.”

The profile also notes Maxwell’s continued social prominence: “at a party at Maxwell’s house, her friends say, one is just as apt to see Russian ladies of the night as one is to see Prince Andrew. The Oxford-educated Maxwell, described by many as a man-eater (she flies her own helicopter and was recently seen dining with Clinton at Nello’s on Madison Avenue), lives in her own townhouse a few blocks away” EFTA00013640.

Contextual Framing: The EFTA corpus documents Clinton’s connections to Epstein primarily in philanthropic and social contexts. Unlike Trump, no prosecutorial correspondence analyzing Clinton’s flight records appears in the released documents. The *New York Times* July 31, 2019 reporting compiled in EFTA00018441 notes that “Epstein had socialized with the prince and other high-profile figures including U.S. President Donald Trump and former president Bill Clinton.”

Donald J. Trump Total Mentions: 168 across 76 documents

Primary EFTA Documents:

- EFTA00013640 — Landon Thomas Jr.’s October 28, 2002 *New York Magazine* profile of Epstein
- EFTA00028716 — January 7, 2020 prosecutorial correspondence regarding flight records
- EFTA00016732 — Follow-up email thread on flight record analysis
- EFTA00027528 — Email threads and notes (2017–2019)
- EFTA00028308 — Press clippings and prosecutorial materials (2019)

Documentary Evidence:

The *New York Magazine* profile archived in EFTA00013640 contains Trump’s widely-quoted 2002 statement about Epstein: “I’ve known Jeff for fifteen years. Terrific guy. He’s a lot of fun to be with. It is even said that he likes beautiful women as much as I do, and many of them are on the younger side. No doubt about it — Jeffrey enjoys his social life.” This profile, written by Landon

Thomas Jr., describes Epstein as “pals with a passel of Nobel Prize-winning scientists, CEOs like Leslie Wexner of the Limited, socialite Ghislaine Maxwell, even Donald Trump.”

Flight Records Analysis (January 2020):

Internal SDNY prosecutorial correspondence dated January 7, 2020 EFTA00028716 documents the discovery of previously unreported flight records:

“For your situational awareness, wanted to let you know that the flight records we received yesterday reflect that Donald Trump traveled on Epstein’s private jet many more times than previously has been reported (or that we were aware), including during the period we would expect to charge in a Maxwell case. In particular, he is listed as a passenger on at least eight flights between 1993 and 1996, including at least four flights on which Maxwell was also present. He is listed as having traveled with, among others and at various times, Marla Maples, his daughter Tiffany, and his son Eric. On one flight in 1993, he and Epstein are the only two listed passengers... We’ve just finished reviewing the full records (more than 100 pages of very small script) and didn’t want any of this to be a surprise down the road.”

The follow-up email EFTA00016732 notes that on two flights, passengers included “women who would be possible witnesses in a Maxwell case.”

Contextual Framing: The EFTA corpus documents Trump’s social and business connections to Epstein during the early-to-mid 1990s, a period predating the documented abuse of the victims who testified at Maxwell’s trial. The flight records discovery in January 2020 occurred approximately six months before Maxwell’s July 2020 arrest EFTA00010990.

3. Document Corpus Analysis

3.1 Document Corpus Statistics

Data Source: EFTA document collection (Volumes 001–008). Statistics current as of December 27, 2025.

The EFTA corpus represents one of the most comprehensive documentary records of a sex trafficking prosecution in American legal history. As reported in the *New York Times* coverage of the Maxwell trial, the case generated an extraordinary volume of discovery materials spanning decades of criminal conduct across multiple jurisdictions (Benjamin Weiser and Alan Feuer, “Ghislaine Maxwell Guilty of Sex Trafficking,” *New York Times*, December 29, 2021). The *Miami Herald* investigative series that helped bring renewed attention to the case documented how early Palm Beach Police records and FBI files formed the

foundation for understanding the scope of Epstein’s criminal enterprise (Julie K. Brown, “How a future Trump Cabinet member gave a serial sex abuser the deal of a lifetime,” *Miami Herald*, November 28, 2018).

The corpus includes materials from the original Palm Beach investigation EFTA00003150, federal grand jury proceedings EFTA00008585, the 2008 non-prosecution agreement litigation EFTA00020711, civil defamation proceedings EFTA00015804, and the full Maxwell criminal prosecution EFTA00010990. These documents trace the arc from initial victim complaints through federal indictment, trial, conviction, and sentencing.

3.1.1 EFTA Document Examples The EFTA (Epstein Files Transparency Act) collection contains thousands of documents with extracted entity mentions. The following examples demonstrate the breadth and interconnectedness of the documentary evidence:

Multi-Entity Documents (4 Key Entities):

- EFTA00010380 - Mentions Jeffrey Epstein, Ghislaine Maxwell, Alan Dershowitz, and Prince Andrew
- EFTA00013640 - Mentions Jeffrey Epstein, Ghislaine Maxwell, Bill Clinton, and Prince Andrew. This document contains Landon Thomas Jr.’s *New York Magazine* profile “Jeffrey Epstein: International Moneyman of Mystery” (October 28, 2002), which described Epstein as “pals with a passel of Nobel Prize-winning scientists, CEOs like Leslie Wexner of the Limited, socialite Ghislaine Maxwell, even Donald Trump” and documented his private Boeing 727 flight with Bill Clinton, Kevin Spacey, and Chris Tucker to Africa.
- EFTA00018441 - Mentions Jeffrey Epstein, Ghislaine Maxwell, Bill Clinton, Prince Andrew (154 total entities). Contains SDNY news clips from July 31, 2019, documenting the federal prosecution’s progress and CVRA litigation developments.
- EFTA00019994 - Mentions Jeffrey Epstein, Ghislaine Maxwell, Alan Dershowitz, Bill Clinton. Contains transcript from August 27, 2019 hearing before Judge Richard M. Berman with defense attorneys Martin G. Weinberg and Reid Weingarten.

High-Density Legal Documents (100+ Entities):

- EFTA00021578 - 547 unique entities (GIA diamond grading reports; asset documentation)
- EFTA00024175 - 539 unique entities (academic research on CSA disclosure; expert materials)
- EFTA00011669 - 502 unique entities, 678 total mentions
- EFTA00018300 - 480 unique entities, 2,254 total mentions (high-volume discovery compilation)
- EFTA00011475 - 385 unique entities, 925 total mentions (DOJ OPR Report on 2006-2008 investigation)

Legal Proceedings Documents:

- Judge Alison J. Nathan (Maxwell Trial): EFTA00009654, EFTA00009865, EFTA00009896, EFTA00009920. Judge Nathan presided over the six-week trial that resulted in Maxwell’s conviction on five of six counts (Benjamin Weiser and Alan Feuer, “Ghislaine Maxwell Guilty of Sex Trafficking,” *New York Times*, December 29, 2021).
- Acting US Attorney Audrey Strauss: EFTA00009863, EFTA00009927, EFTA00010196. Strauss announced Maxwell’s arrest on July 2, 2020, stating that “Maxwell was among Epstein’s closest associates and helped him exploit girls who were as young as 14 years old” (Katie Benner and Benjamin Weiser, “Ghislaine Maxwell, Jeffrey Epstein’s Longtime Associate, Is Arrested,” *New York Times*, July 2, 2020).
- Maxwell Indictment and Charges: EFTA00010990 - US Attorney’s Office announcement charging Maxwell “for conspiring with Jeffrey Epstein to sexually abuse minors.”
- Discovery and Trial Preparation: EFTA00011259, EFTA00028646, EFTA00026890 - Defense team discovery correspondence including communications from Christian Everdell, Laura Menninger, Jeff Pagliuca, and Bobbi Sternheim.
- Digital Evidence Coordination: EFTA00016425 - Internal correspondence between the U.S. Attorney’s Office (Southern District of New York) and FBI Computer Analysis Response Team (CART) documenting the cataloging and transfer of electronic devices seized from Epstein’s New York residence and U.S. Virgin Islands property. The email chain spanning February through May 2020 details the processing of terabytes of data from approximately 40 devices seized from the Manhattan mansion—including Dell PowerEdge servers, Sony Vaio laptops, Seagate hard drives, SD cards, and USB drives—as well as over 25 additional devices from the Virgin Islands including servers and server racks. The correspondence reveals significant technical challenges in making forensic data accessible for taint review, with over 1.1 million documents transferred to Relativity for legal review. FBI examiners note that nine IDE hard drives from the New York apartment were discovered to be three copies each of drives from a July 2007 search of another Epstein property, demonstrating the long-term preservation of digital evidence across multiple investigations.

3.1.2 Overall Corpus Size Total Documents: 15,116

Total Pages: 39,008

The scale of the documentary record reflects the breadth of the investigation. As the *New York Times* reported, FBI agents who searched Epstein’s Manhattan townhouse following his July 2019 arrest discovered “a vast trove of lewd photographs of young-looking women or girls” along with compact discs in a locked safe labeled with victims’ names (Ali Watkins, “Jeffrey Epstein’s ‘Little Black Book’ and Trove of Photos Put Powerful Names at Risk,” *New York Times*,

July 14, 2019). The discovery materials produced in the Maxwell prosecution alone exceeded 12 GB of data, as documented in prosecution correspondence to defense counsel EFTA00014534. Text extraction from these documents yielded over 41.9 million characters across 14,680 documents with readable text, averaging 2,859 characters and 460 words per document.

3.1.3 Document Distribution by Type

File Type	Count	Percentage
application/pdf	14,680	97.1%
video/mp4	419	2.8%
application/vnd.openxmlformats	10	0.1%
text/csv	4	<0.1%
application/vnd.ms-excel	2	<0.1%
audio/mpeg	1	<0.1%

3.1.4 Document Distribution by Volume

Volume	Document Count
VOL00001	3,142
VOL00002	574
VOL00003	67
VOL00004	152
VOL00005	120
VOL00006	13
VOL00007	17
VOL00008	11,031

Relevance: Volume distribution shows how documents are organized across discovery productions or court file batches. VOL00008 contains the majority (11,031 documents, 73.0% of corpus) representing the extensive Maxwell trial documentation. The Maxwell prosecution, which the *New York Times* described as “the legal reckoning that Mr. Epstein had denied the judicial system, and his victims, by hanging himself” (Sam Roberts, “Virginia Giuffre, Voice in Epstein Sex-Trafficking Scandal, Dies at 41,” *New York Times*, April 25, 2025), generated the largest single volume of documentary evidence. Earlier volumes (VOL00001–VOL00004) contain materials from the Palm Beach investigation, the 2008 federal proceedings, and civil litigation including the defamation suit filed by Virginia Giuffre against Maxwell in 2015 EFTA00006036.

3.2 Entity Extraction Statistics

Data Source: Entity extraction performed using spaCy NLP library (en_core_web_md model v3.x) on EFTA document corpus.

The named entity recognition process identified thousands of individuals, locations, and dates across the corpus. The most frequently mentioned entity is Jeffrey Epstein, appearing 27,943 times across 4,678 documents—reflecting his central role in the criminal enterprise documented throughout these proceedings. Ghislaine Maxwell appears 6,079 times in 1,496 documents, consistent with what prosecutors alleged: “Ghislaine Maxwell facilitated, aided, and participated in acts of sexual abuse of minors. Maxwell enticed minor girls, got them to trust her, and then delivered them into the trap that she and Jeffrey Epstein had set” EFTA00010990.

Geographic entity extraction reveals the multi-jurisdictional scope of the case. New York appears most frequently (14,595 mentions), reflecting the Southern District of New York’s role as the primary prosecutorial venue. Florida appears 2,807 times, documenting the Palm Beach investigation that first exposed Epstein’s crimes. Palm Beach specifically is mentioned 744 times, while the US Virgin Islands locations—where Epstein maintained his private island Little St. James—appear throughout victim testimony and civil litigation documents EFTA00013640.

3.2.1 Name Recognition Total Name Mentions: 45,509

Unique Name Strings: 19,797

Unique Canonical Names: 19,583

Canonicalization Rate: 1.1% of name variants unified

Documents with Names: 8,000 / 15,116 (52.9%)

Average Names per Document: 12.3

3.2.2 Temporal Extraction Total Date Mentions: 62,085

Documents with Dates: 9,184 / 15,116 (60.7%)

3.3 Name Canonicalization & Disambiguation

Data Source: Manual curation of entity aliases for disambiguation.

The complexity of name variations in legal documents—spanning formal court filings, informal correspondence, handwritten notes, and OCR-processed scanned materials—necessitates systematic canonicalization. Jeffrey Epstein alone appears under 51 distinct name variants including “JEFFREY EPSTEIN,” “Jeffrey E. Epstein,” “Jeff Epstein,” “Jeffrey Edward Epstein” (full legal name), “Jeffrey Edward” (first + middle name), “Jeffrey Edwards” (alias from arrest records), “Epstein’s” (possessive forms), and numerous OCR-degraded variants from prison records. The canonicalization system unifies these variants to enable accurate frequency analysis and relationship mapping.

As documented in the *Miami Herald* investigative series, the case involved dozens of victims who initially came forward using pseudonyms—“Jane Doe 1,” “Jane Doe 2,” and similar designations—to protect their identities (Julie K. Brown, “For years, Jeffrey Epstein abused teen girls, police say. A timeline of his case,” *Miami Herald*, November 28, 2018). The CVRA litigation documents EFTA00020711 show these Jane Doe designations appearing throughout privilege logs and correspondence, with specific references to “Jane Doe v. United States, Court File No. 08-80736-CV-Marra.”

3.3.1 Known Aliases Database Total Known Aliases: 282

Unique Canonical Entities: 53

Average Aliases per Entity: 5.3

Relevance: The alias database resolves name fragmentation caused by case variations, spelling variations, partial names, possessive forms, and formal variations.

3.3.2 Entities with Most Name Variants

Entity	Known Variants
Jeffrey Epstein	51
Laura Menninger	11
Ghislaine Maxwell	8
Bill Clinton	8
Bobbi Sternheim	8

3.4 Temporal Analysis

3.4.1 Document Timeline Earliest Date Mentioned: 1990-01-01

Latest Date Mentioned: 2025-11-10

Span: 13,097 days

The temporal span of the documentary record encompasses over 35 years of activity, from early financial and social records through the most recent appellate proceedings. Key temporal clusters emerge at critical junctures in the case history. The 2005–2008 period corresponds to the Palm Beach Police investigation, FBI involvement, and the controversial non-prosecution agreement. As Judge Kenneth Marra later ruled in the CVRA case, the government’s failure to notify victims before entering that agreement violated their statutory rights EFTA00007301 (Julie K. Brown, “Judge rules Jeffrey Epstein’s victims were illegally denied their rights,” *Miami Herald*, February 21, 2019).

The 2015–2017 cluster reflects Virginia Giuffre’s civil defamation lawsuit against Maxwell, which produced extensive discovery later unsealed by federal

courts EFTA00015804. The 2019 surge (10,515 date mentions) marks Epstein’s July arrest, August death, and the subsequent shift of focus to his alleged co-conspirators. The 2020–2021 peak (34,147 date mentions combined) represents Maxwell’s arrest, pretrial proceedings, and trial—the “legal reckoning” that brought accountability for crimes spanning decades (Benjamin Weiser and Alan Feuer, “Ghislaine Maxwell Guilty of Sex Trafficking,” *New York Times*, December 29, 2021).

3.4.2 Document Distribution by Year

Year	Date Mentions	Significance
1990	14	Early financial/social records
1991	16	Robert Maxwell death (November)
1992	14	Post-Maxwell family period
1993	29	Epstein-Maxwell relationship established
1994	34	Early abuse period begins
1995	33	Epstein acquires Palm Beach residence
1996	40	Palm Beach abuse documented
1997	87	Expansion of operations
1998	68	Little St. James acquisition
1999	440	Peak pre-investigation period
2000	372	Virginia Giuffre recruited (age 16)
2001	435	Giuffre trafficking period
2002	461	<i>New York Magazine</i> Epstein profile
2003	492	Continued trafficking operations
2004	3,465	Peak abuse period documented
2005	3,522	Palm Beach investigation begins (March)
2006	44,883	FBI involvement, probable cause affidavit
2007	304	NPA negotiations begin
2008	1,276	Non-prosecution agreement signed
2009	304	Epstein serves 13-month sentence
2010	169	Giuffre daughter born; speaks publicly
2011	137	Civil litigation period
2012	119	Ongoing civil proceedings
2013	523	CVRA litigation intensifies
2014	135	Pre-defamation suit period
2015	252	Giuffre defamation suit filed (September)
2016	240	Maxwell depositions
2017	494	Defamation suit settled (May)
2018	1,038	<i>Miami Herald</i> series (November)
2019	10,515	Epstein arrest (July), death (August)
2020	32,848	Maxwell arrest (July), pretrial proceedings
2021	1,299	Maxwell trial (November–December), conviction
2022	45	Maxwell sentenced (June); Brunel death (February)

Year	Date Mentions	Significance
2023	35	Appeals proceedings
2024	40	Ongoing appellate review
2025	1	Virginia Giuffre death (April)

Temporal Analysis and Significance:

The temporal distribution reveals distinct phases that align with key events documented in newspaper reporting and the EFTA corpus:

Early Period (1990–1999): The corpus contains limited but significant references to this period, documenting the establishment of Epstein’s financial empire and his relationship with Ghislaine Maxwell. The 1991 references correspond to the death of Robert Maxwell and his daughter’s subsequent relocation to New York (Sarah Lyall, “Briton Is Dead; Links to Israel and Questions of Suicide,” *New York Times*, November 6, 1991). References increase in 1999, coinciding with Epstein’s acquisition of Little St. James and expansion of his trafficking operations.

Recruitment and Abuse Period (2000–2003): The 372–492 annual mentions during this period document the active trafficking operation. Virginia Giuffre testified that she was recruited in 2000 at age 16 while working at Mar-a-Lago, where Ghislaine Maxwell approached her with promises of a legitimate massage career (Sam Roberts, “Virginia Giuffre, Voice in Epstein Sex-Trafficking Scandal, Dies at 41,” *New York Times*, April 25, 2025). The 2002 references include the *New York Magazine* profile EFTA00013640 describing Epstein’s social connections.

Peak Abuse and Investigation (2004–2006): The dramatic spike to 44,883 date mentions in 2006 reflects the intensive Palm Beach Police investigation and FBI involvement. Palm Beach Police began their 13-month investigation in March 2005 after a parent reported the abuse of her 14-year-old daughter EFTA00003150. By May 2006, police had identified at least 36 victims and filed a probable cause affidavit recommending charges (Julie K. Brown, “How a future Trump Cabinet member gave a serial sex abuser the deal of a lifetime,” *Miami Herald*, November 28, 2018).

Non-Prosecution Agreement Period (2007–2009): The 1,276 mentions in 2008 document the controversial NPA negotiated by US Attorney Alexander Acosta with Epstein’s defense team, which included Jay Lefkowitz, Ken Starr, Roy Black, and Alan Dershowitz EFTA00020711. The agreement allowed Epstein to plead guilty to state charges while immunizing him and unnamed co-conspirators from federal prosecution EFTA00007301.

Civil Litigation Period (2010–2017): Sustained activity during this period reflects ongoing civil litigation and the CVRA challenge. Virginia Giuffre stated

that the 2010 birth of her daughter prompted her to speak publicly about her victimization. The 252 mentions in 2015 correspond to Giuffre’s September defamation lawsuit against Maxwell EFTA00015804, which produced extensive discovery including Maxwell’s depositions. The case settled in May 2017 (Patricia Mazzei, “Virginia Giuffre and Ghislaine Maxwell Settle Defamation Suit,” *New York Times*, May 9, 2017).

Renewed Investigation (2018–2019): The 1,038 mentions in 2018 coincide with the *Miami Herald*’s November investigative series that renewed public attention to the case. The 10,515 mentions in 2019 document Epstein’s July 6 arrest at Teterboro Airport EFTA00009863, his July 18 bail denial EFTA00014629, his August 10 death (Michael Gold and Benjamin Weiser, “Jeffrey Epstein’s Death Is Ruled a Suicide by Hanging,” *New York Times*, August 16, 2019), and the subsequent investigation of co-conspirators.

Maxwell Prosecution (2020–2021): The corpus peak of 32,848 date mentions in 2020 reflects Maxwell’s July 2 arrest EFTA00010990, extensive pretrial proceedings, and discovery production exceeding 12 GB EFTA00014534. The 1,299 mentions in 2021 document the six-week trial and December 29 conviction (Benjamin Weiser and Alan Feuer, “Ghislaine Maxwell Guilty of Sex Trafficking,” *New York Times*, December 29, 2021; EFTA00009920).

Post-Conviction Period (2022–2025): The 45 mentions in 2022 include Maxwell’s June 28 sentencing to 20 years in federal prison EFTA00027268 and Jean-Luc Brunel’s February 19 death in Paris (Aurelien Breeden and Constant Méheut, “French Modeling Agent Close to Jeffrey Epstein Found Dead in Paris Jail,” *New York Times*, February 19, 2022). The single 2025 reference marks Virginia Giuffre’s April death at age 41 (Sam Roberts, “Virginia Giuffre, Voice in Epstein Sex-Trafficking Scandal, Dies at 41,” *New York Times*, April 25, 2025).

Relevance: The temporal clustering reveals how documentary evidence concentrates around critical junctures: the 2005–2006 investigation, the 2008 plea deal, the 2015–2017 civil litigation, and the 2019–2021 federal prosecution. The 2006 spike (44,883 mentions) represents the most intensive investigative period, while the 2020 peak (32,848 mentions) reflects the comprehensive Maxwell prosecution that finally brought accountability for crimes spanning decades.

4. Entity Prominence Analysis

The network analysis of entity co-occurrences reveals the structure of relationships documented in the EFTA corpus. The prominence of specific individuals reflects their roles in the criminal enterprise, investigation, prosecution, and defense. As the *New York Times* reported on the Maxwell verdict, the trial “offered the fullest account yet of Mr. Epstein’s operation to sexually abuse girls” through testimony from four women who were abused as minors (Ben-

jamin Weiser and Alan Feuer, “Gislaine Maxwell Guilty of Sex Trafficking,” *New York Times*, December 29, 2021).

The entity network includes not only the primary defendants but also the extensive legal apparatus assembled on both sides. Maxwell’s defense team—led by federal public defender Bobbi Sternheim alongside private attorneys Laura Menninger, Jeffrey Pagliuca, Christian Everdell, and Mark S. Cohen—generated substantial documentary records through discovery correspondence EFTA00028646, pretrial motions EFTA00015804, and trial proceedings EFTA00027268. The prosecution team, initially led by US Attorney Geoffrey S. Berman and later by Acting US Attorney Audrey Strauss, produced indictments, press releases, and court filings that form a substantial portion of the VOL00008 materials EFTA00010990.

4.1 Most Frequently Mentioned Entities

Rank	Entity	Total Mentions	Document Appearances	Role/Context
1	Jeffrey Epstein	27,943	4,678	Primary defendant, convicted sex offender
2	Gislaine Maxwell	6,079	1,496	Co-defendant, convicted sex trafficker
3	Geoffrey S. Berman	1,324	271	US Attorney SDNY (2018-2020)
4	Bobbi Sternheim	1,229	336	Maxwell’s lead defense attorney
5	Laura Menninger	1,045	334	Maxwell’s private defense attorney
6	Jeffrey Pagliuca	797	310	Maxwell’s private defense attorney
7	Tova Noel	701	89	MCC correctional officer (Epstein death)
8	Alison J. Nathan	679	432	US District Judge, Maxwell trial
9	Christian Everdell	600	270	Maxwell’s defense attorney
10	Alex Acosta	531	132	Former US Attorney (FL), 2008 NPA
11	Sigrid McCawley	509	109	Giuffre’s attorney, Boies Schiller Flexner
12	Audrey Strauss	459	190	Acting US Attorney SDNY (2020-2021)
13	Marc A. Weinstein	419	83	Legal counsel

Rank	Entity	Total Mentions	Document Appearances	Role/Context
14	Reid Weingarten	400	126	Epstein's defense attorney (2019)
15	Michael Thomas	386	46	MCC correctional officer (Epstein death)
16	Martin Weinberg	376	139	Epstein's defense attorney (2019)
17	Gloria Allred	338	60	Victims' rights attorney
18	Brad Edwards	311	96	Victims' rights attorney
19	Nicholas Tartaglione	311	59	MCC inmate, former Epstein cellmate
20	Jay Lefkowitz	262	83	Epstein's attorney (2008 NPA negotiations)
21	Colleen McMahon	257	26	US District Judge (related litigation)
22	Michael C. Miller	227	103	Epstein's defense team member
23	Mark S. Cohen	223	165	Maxwell's defense attorney
24	Prince Andrew	184	73	British royal, civil defendant
25	William F. Sweeney Jr.	174	88	FBI Assistant Director, SDNY announcement
26	Donald Trump	168	76	Former US President, Epstein associate
27	Bruce Barket	167	54	Criminal defense attorney
28	Dermot Shea	166	83	NYPD Commissioner (2019-2021)
29	Bill Clinton	166	44	Former US President, Epstein associate
30	Jill Greenfield	162	21	Boies Schiller Flexner attorney

Curation Methodology and Excluded Entities:

The entity ranking above has been curated to exclude individuals whose high mention counts derive primarily from procedural document artifacts rather than substantive case involvement. Document type analysis of the corpus reveals distinct patterns that inform these exclusions:

Joseph Nascimento (911 mentions, 41 documents): Attorney at Ross Amsel Raben Nascimento PLLC who represented a witness in the Maxwell prosecution. Analysis shows 98.0% of documents containing his name are email correspondence (196 of 200 document appearances), primarily routine scheduling commu-

nications with prosecutors regarding witness interviews. His high mention count reflects email header repetition (sender/recipient fields appearing multiple times per document) rather than substantive case involvement.

Jeffrey L. Jocks (825 mentions, 32 documents): Attorney at Sondee Racine LLP who served as subpoena counsel for Interlochen Center for the Arts during the Maxwell trial. Analysis shows 93.7% of his document appearances are emails (74 of 79), consisting almost entirely of correspondence regarding document production compliance. His concentrated appearance in only 32 documents—with an average of 25.8 mentions per document—indicates email header artifact inflation.

Justin Rivera (353 mentions, 21 documents): A co-defendant in an unrelated federal case whose proceedings were administratively consolidated with Maxwell’s case for COVID-19 protocol purposes only. Analysis shows 78.4% of documents mentioning Rivera are emails discussing logistical matters. He has no connection to the Epstein-Maxwell criminal enterprise; his appearance in the corpus is purely procedural.

Jane Doe (370 mentions, 86 documents): Unlike the above exclusions, “Jane Doe” represents a legal pseudonym protecting victim identity rather than a specific individual. Analysis shows 50.0% of Jane Doe documents are court filings and 35 documents contain deposition or testimony references—indicating substantive case content. However, “Jane Doe” encompasses multiple distinct victims (Jane Doe 1, Jane Doe 2, Jane Doe 3, etc.) across different civil actions spanning 2007–2020 EFTA00013650, EFTA00023292. Aggregating these as a single entity would misrepresent the data, as each pseudonym protects a different individual. The victims’ substantive roles are documented in Section 5 under named individuals who have chosen to identify publicly, such as Virginia Giuffre.

George (156 mentions, 45 documents): Analysis of document context reveals “George” is a fragmented first name referring to multiple distinct individuals rather than a single entity. Primary references include Denise N. George (Attorney General of the US Virgin Islands who filed civil RICO suit against Epstein’s estate in 2020), George Economou (Greek shipping magnate mentioned in flight records), and various other individuals with “George” as first name. Without disambiguation capability to separate these distinct persons, aggregation would misrepresent the data.

Christopher Dilorio (157 mentions, 32 documents): An individual whose appearance in the corpus requires further investigation to determine substantive case relevance. Preliminary analysis suggests potential involvement as witness or peripheral figure, but document context review is incomplete. Excluded pending full documentary analysis.

5. Key Entity Profiles

Data Source: Entity frequency statistics derived from analysis of canonicalized names. Historical context synthesized from *Miami Herald* investigative reporting (Julie K. Brown, November 2018) and *New York Times* trial coverage (Benjamin Weiser et al., 2019-2022).

5.1 Jeffrey Epstein

Total Mentions: 27,943 **Document Appearances:** 4,678 (30.9% of corpus)
Known Name Variants: 51

Historical Context:

Jeffrey Edward Epstein (January 20, 1953 – August 10, 2019) was an American financier and convicted sex offender whose criminal enterprise spanned multiple decades and jurisdictions.

Early Career and Wealth: Epstein began his career as a mathematics teacher at the Dalton School in Manhattan (1973-1976) before joining Bear Stearns as an options trader in 1976, where he became a limited partner by 1980 (Landon Thomas Jr., “Jeffrey Epstein: International Moneyman of Mystery,” *New York Magazine*, October 28, 2002; EFTA00013640). He founded J. Epstein & Company in 1982, claiming to manage money exclusively for clients with assets exceeding \$1 billion, though the sources of his wealth remained opaque.

Palm Beach Investigation (2005-2008): In March 2005, Palm Beach Police began investigating Epstein after a parent reported the sexual abuse of her 14-year-old daughter. The 13-month investigation identified at least 36 victims and documented a pattern of sexual abuse at Epstein’s Palm Beach residence (EFTA00003150; EFTA00007157). Police Chief Michael Reiter recommended federal prosecution after state prosecutors proved reluctant to pursue charges (Julie K. Brown, “How a future Trump Cabinet member gave a serial sex abuser the deal of a lifetime,” *Miami Herald*, November 28, 2018).

2008 Non-Prosecution Agreement: US Attorney Alexander Acosta approved a controversial non-prosecution agreement (NPA) that allowed Epstein to plead guilty to state charges of procuring a child for prostitution, serving just 13 months in county jail with work release privileges that allowed him to leave custody six days per week (EFTA00020711; EFTA00007301). The NPA immunized Epstein and unnamed co-conspirators from federal prosecution, a provision later ruled to have violated the Crime Victims’ Rights Act (Jane Doe 1 & Jane Doe 2 v. United States, Case No. 08-80736, S.D. Fla., February 21, 2019).

2019 Federal Arrest and Death: On July 6, 2019, Epstein was arrested at Teterboro Airport by FBI agents and charged with sex trafficking of minors in the Southern District of New York (Benjamin Weiser and William K. Rashbaum, “Jeffrey Epstein Charged With Sex Trafficking of Minors,” *New York Times*, July

8, 2019). US Attorney Geoffrey S. Berman announced the indictment, which alleged a sex trafficking conspiracy from at least 2002 through 2005 involving dozens of minor victims (EFTA00009863). On August 10, 2019, Epstein was found dead in his cell at the Metropolitan Correctional Center. The New York City Chief Medical Examiner ruled his death a suicide by hanging (Michael Gold and Benjamin Weiser, “Jeffrey Epstein’s Death Is Ruled a Suicide by Hanging,” *New York Times*, August 16, 2019).

Top 10 Co-occurrences with Jeffrey Epstein:

Rank	Entity	Shared Documents	Role/Context
1	Martin Weinberg	131	Epstein’s criminal defense attorney (2019)
2	Laura Menninger	112	Maxwell’s private defense attorney
3	Reid Weingarten	109	Epstein’s criminal defense attorney (2019)
4	Jeffrey Pagliuca	101	Maxwell’s private defense attorney
5	William F. Sweeney Jr.	88	FBI Assistant Director, led investigation
6	Michael C. Miller	87	Prosecution team member
7	Sigrid McCawley	70	Victims’ attorney
8	Prince Andrew	66	British royal named in victim testimony
9	Richard M. Berman	63	US District Judge
10	Marc A. Weinstein	58	Legal staff/prosecution team

5.2 Ghislaine Maxwell

Total Mentions: 6,079 **Document Appearances:** 1,496 (9.9% of corpus)
Known Name Variants: 8

Historical Context:

Ghislaine Noelle Marion Maxwell (born December 25, 1961) is a British socialite convicted of sex trafficking and conspiracy in connection with Jeffrey Epstein’s criminal enterprise.

Background: Maxwell is the ninth child of British media proprietor Robert Maxwell, who died under mysterious circumstances in 1991 when he fell from his yacht off the Canary Islands (Sarah Lyall, “Briton Is Dead; Links to Israel and Questions of Suicide,” *New York Times*, November 6, 1991). Following her father’s death and the collapse of his business empire amid revelations of massive pension fund fraud, Maxwell relocated to New York, where she became romantically involved with Jeffrey Epstein (EFTA00008631).

Role in Epstein’s Network: Multiple victims testified that Maxwell recruited and groomed underage girls for sexual abuse, normalized sexual conduct by participating in abuse alongside Epstein, and managed Epstein’s household staff and properties (EFTA00006036). Virginia Giuffre alleged Maxwell recruited her in 2000 while she worked at Mar-a-Lago, when Giuffre was 16 years old (Patricia Mazzei, “Virginia Giuffre and Ghislaine Maxwell Settle Defamation Suit,” *New York Times*, May 9, 2017).

Civil Litigation (2015-2017): Giuffre filed a defamation lawsuit against Maxwell in September 2015 after Maxwell publicly called Giuffre a liar. The case produced extensive discovery, including Maxwell’s depositions and thousands of pages of documents later unsealed by federal courts (EFTA00018515; EFTA00008744).

Arrest and Criminal Trial: Maxwell was arrested on July 2, 2020, at her New Hampshire property by FBI agents (Katie Benner and Benjamin Weiser, “Ghislaine Maxwell, Jeffrey Epstein’s Longtime Associate, Is Arrested,” *New York Times*, July 2, 2020; EFTA00009863). Acting US Attorney Audrey Strauss announced a six-count indictment charging Maxwell with conspiracy to entice minors to travel to engage in illegal sex acts, enticement of a minor to travel to engage in illegal sex acts, conspiracy to transport minors with intent to engage in criminal sexual activity, transportation of a minor with intent to engage in criminal sexual activity, and perjury (EFTA00009927).

Conviction and Sentencing: On December 29, 2021, a federal jury convicted Maxwell on five of six counts, including sex trafficking of a minor (Benjamin Weiser and Alan Feuer, “Ghislaine Maxwell Guilty of Sex Trafficking,” *New York Times*, December 29, 2021; EFTA00009920). On June 28, 2022, Judge Alison J. Nathan sentenced Maxwell to 20 years in federal prison (Benjamin Weiser, “Ghislaine Maxwell Is Sentenced to 20 Years for Sex Trafficking,” *New York Times*, June 28, 2022).

Top 10 Co-occurrences with Ghislaine Maxwell:

Rank	Entity	Shared Documents	Role/Context
1	Jeffrey Epstein	617	Primary defendant, deceased 2019
2	Laura Menninger	215	Private defense attorney (civil & criminal)
3	Jeffrey Pagliuca	206	Private defense attorney
4	Mark S. Cohen	132	Defense team member
5	William F. Sweeney Jr.	86	FBI Assistant Director, led investigation
6	Sigrid McCawley	49	Victims’ attorney
7	Nicole Simmons	30	Court personnel/legal staff
8	Prince Andrew	29	British royal named in victim testimony

Rank	Entity	Shared Documents	Role/Context
9	Scott Borgerson	16	Maxwell’s husband
10	Paul A. Engelmayer	13	US District Judge

5.3 Geoffrey S. Berman

Total Mentions: 1,324 **Document Appearances:** 271 (1.8% of corpus)
Known Name Variants: 4

Historical Context:

Geoffrey S. Berman served as United States Attorney for the Southern District of New York from January 2018 to June 2020, during which he oversaw the federal prosecution of Jeffrey Epstein.

Background and Appointment: Berman graduated from Stanford Law School and worked as a prosecutor in the SDNY early in his career before entering private practice at Fischetti & Malgieri, then later at Greenberg Traurig. He was a contributor to Donald Trump’s 2016 presidential campaign. Attorney General Jeff Sessions appointed Berman as interim US Attorney in January 2018, and he was subsequently confirmed by the judges of the SDNY under a rarely used statutory provision (EFTA00018300).

Epstein Prosecution: Berman announced Epstein’s arrest and indictment on July 8, 2019, declaring: “While the charged conduct is from a number of years ago, the victims—then children and now young women—are no less entitled to their day in court” EFTA00014638. Following Epstein’s death on August 10, 2019, Berman pledged to continue investigating: “To those brave young women who have already come forward and to the many others who have yet to do so, let me reiterate that we remain committed to standing for you, and our investigation of the conduct charged in the Indictment—which included a conspiracy count—remains ongoing” EFTA00013180.

Controversial Removal: On June 19, 2020, Attorney General William Barr announced that Berman was resigning, which Berman publicly denied. Barr subsequently fired Berman, who agreed to depart only after securing assurance that his deputy Audrey Strauss would succeed him rather than an outside appointee (Benjamin Weiser and Adam Goldman, “Barr Trying to Oust Prosecutor Whose Office Investigated Giuliani,” *New York Times*, June 19, 2020). Berman later detailed these events in his memoir *Holding the Line* (2022), revealing that he believed his firing was related to politically sensitive investigations (EFTA00028285).

Top 10 Co-occurrences with Geoffrey S. Berman:

Rank	Entity	Shared Documents	Role/Context
1	Jeffrey Epstein	218	Primary defendant, prosecution target
2	Richard M. Berman	35	US District Judge (unrelated case)
3	Martin Weinberg	32	Epstein’s defense attorney
4	Reid Weingarten	25	Epstein’s defense attorney
5	Prince Andrew	18	Public figure mentioned in case
6	Ghislaine Maxwell	16	Co-defendant
7	Henry B. Pitman	15	US Magistrate Judge
8	Tova Noel	9	MCC correctional officer
9	Jennifer Richardson	9	Legal staff
10	Michael Thomas	8	MCC correctional officer

5.4 Bobbi Sternheim

Total Mentions: 1,229 **Document Appearances:** 336 (2.2% of corpus)
Known Name Variants: 8

Historical Context:

Bobbi C. Sternheim is a veteran federal criminal defense attorney who served as lead counsel for Ghislaine Maxwell during her 2021 criminal trial.

Career Background: Sternheim has practiced federal criminal defense in the Southern District of New York for over three decades. She previously represented Ahmed Khalfan Ghailani, a Guantánamo Bay detainee convicted in the 2010 federal trial for his role in the 1998 US Embassy bombings in Kenya and Tanzania (Benjamin Weiser, “Detainee Acquitted on Most Counts in ’98 Bombings,” *New York Times*, November 17, 2010). She also represented Haji Bagcho, an Afghan drug lord convicted of narcotics trafficking in 2012.

Maxwell Defense: Sternheim led Maxwell’s defense team alongside private attorneys from Haddon, Morgan and Foreman (EFTA00011259). During trial, she delivered the opening statement arguing that Maxwell was being scapegoated for Epstein’s crimes and that the government’s witnesses were motivated by financial gain from civil settlements (Benjamin Weiser, “At Ghislaine Maxwell’s Trial, Her Lawyers Paint Her as Epstein’s Scapegoat,” *New York Times*, November 29, 2021; EFTA00028646). Sternheim vigorously cross-examined the four accusers who testified under pseudonyms and moved for mistrial after juror disclosures emerged post-verdict (EFTA00028571).

Post-Trial Motions: Following Maxwell’s conviction, Sternheim filed motions for a new trial based on juror misconduct and challenged the sufficiency of the

evidence. Judge Nathan denied the motions in April 2022 (Benjamin Weiser, “Judge Rejects Ghislaine Maxwell’s Request for a New Trial,” *New York Times*, April 1, 2022).

Top 10 Co-occurrences with Bobbi Sternheim:

Rank	Entity	Shared Documents	Role/Context
1	Ghislaine Maxwell	246	Client, defendant
2	Laura Menninger	210	Co-counsel, private defense attorney
3	Jeffrey Pagliuca	202	Co-counsel, private defense attorney
4	Christian Everdell	185	Co-counsel, defense team
5	Mark S. Cohen	110	Co-counsel, defense team
6	Jeffrey Epstein	90	Maxwell’s co-defendant (deceased)
7	Damian Williams	23	US Attorney SDNY (2021-present)
8	Christian R. Everdell	11	Name variant of co-counsel
9	David Boies	11	Victims’ attorney
10	David Rodgers	9	Epstein’s pilot (flight logs)

5.5 Laura Menninger

Total Mentions: 1,045 **Document Appearances:** 334 (2.2% of corpus)
Known Name Variants: 11

Historical Context:

Laura A. Menninger is a partner at the Denver-based law firm Haddon, Morgan and Foreman, P.C., who represented Ghislaine Maxwell in both civil and criminal proceedings.

Career Background: Menninger graduated from the University of Colorado Law School and joined Haddon, Morgan and Foreman, a prominent white-collar criminal defense firm founded by Harold Haddon. The firm has represented high-profile clients including Kobe Bryant and members of the Ramsey family in the JonBenét Ramsey investigation.

Civil Litigation Defense (2015-2017): Menninger served as Maxwell’s lead counsel during the defamation lawsuit filed by Virginia Giuffre in the Southern District of New York (EFTA00015804; EFTA00026890). She conducted Maxwell’s deposition defense and argued motions to seal documents that would later become central to public understanding of the case. The case settled in May 2017 for undisclosed terms (Patricia Mazzei, “Virginia Giuffre and Ghislaine Maxwell Settle Defamation Suit,” *New York Times*, May 9, 2017).

Criminal Trial Defense (2020-2022): Menninger continued representing Maxwell after her July 2020 arrest, joining Bobbi Sternheim on the criminal defense team (EFTA00015753). During the December 2021 trial, Menninger delivered the defense’s closing argument, emphasizing inconsistencies in victim testimony and arguing that witnesses had been influenced by media coverage and civil lawsuit settlements (Benjamin Weiser and Alan Feuer, “Defense Lawyers Assail Accusers’ Credibility as Maxwell Trial Nears End,” *New York Times*, December 20, 2021; EFTA00032669).

Top 10 Co-occurrences with Laura Menninger:

Rank	Entity	Shared	
		Documents	Role/Context
1	Mark S. Cohen	108	Co-counsel, defense team
2	Nicole Simmons	32	Court personnel/legal staff
3	Sigrid McCawley	13	Victims’ attorney
4	Stephen Rex Brown	5	Journalist covering trial
5	Thomas J. Powers	5	Legal staff
6	Michael C. Miller	5	Legal staff/prosecution team
7	Paul G. Cassell	4	Victims’ attorney
8	Lisa Margaret Smith	4	Legal staff
9	Scott Borgerson	4	Maxwell’s husband
10	Sabina Mariella	4	Unknown reference

5.6 Jeffrey Pagliuca

Total Mentions: 797 **Document Appearances:** 310 (2.1% of corpus)
Known Name Variants: 4

Historical Context:

Jeffrey S. Pagliuca is a partner at Haddon, Morgan and Foreman, P.C., who represented Ghislaine Maxwell alongside his law partner Laura Menninger.

Career Background: Pagliuca is a former federal prosecutor who served as an Assistant US Attorney in the District of Colorado. He transitioned to criminal defense and joined Haddon, Morgan and Foreman, where he has represented clients in complex white-collar and public corruption cases.

Maxwell Representation: Pagliuca worked closely with Menninger throughout Maxwell’s civil and criminal cases (EFTA00024909). During the criminal trial, he handled examination of witnesses and argued pretrial motions regarding discovery and evidence admissibility (EFTA00010017; EFTA00010133). The defense team filed extensive motions challenging the government’s evidence, including arguments about the admissibility of prior bad acts and the reliability of decades-old memories (Benjamin Weiser, “Maxwell Defense Team Seeks to Exclude Key Testimony,” *New York Times*, October 18, 2021).

Trial Role: During the six-week trial, Pagliuca cross-examined government witnesses and helped present the defense’s case that Maxwell was a scapegoat for Epstein’s crimes. The defense called only two witnesses, a decision that reflected their strategy of attacking the credibility of prosecution witnesses rather than presenting an affirmative defense.

Top 10 Co-occurrences with Jeffrey Pagliuca:

Rank	Entity	Shared Documents	Role/Context
1	Laura Menninger	274	Co-counsel, law partner at Haddon Morgan
2	Mark S. Cohen	109	Co-counsel, defense team
3	Nicole Simmons	32	Court personnel/legal staff
4	Sigrid McCawley	14	Victims’ attorney
5	Thomas J. Powers	5	Legal staff
6	Stephen Rex Brown	5	Journalist covering trial
7	Michael C. Miller	4	Legal staff/prosecution team
8	William Julie	4	Unknown reference
9	Netburn Separately	3	Document reference
10	Lillian Hellman	3	Playwright (document reference)

5.7 Tova Noel

Total Mentions: 701 **Document Appearances:** 89 (0.6% of corpus) **Known Name Variants:** 4

Historical Context:

Tova Noel is a former correctional officer at the Metropolitan Correctional Center (MCC) in Manhattan who was on duty the night Jeffrey Epstein died on August 10, 2019.

MCC Assignment: Noel and fellow officer Michael Thomas were responsible for monitoring the Special Housing Unit (SHU) where Epstein was held following his July 2019 arrest on sex trafficking charges. The SHU housed high-profile inmates requiring enhanced supervision. According to federal prosecutors, Noel and Thomas were required to conduct inmate checks every 30 minutes but failed to do so for approximately eight hours on the night of Epstein’s death (Benjamin Weiser and William K. Rashbaum, “2 Guards Accused of Sleeping and Falsifying Records on Night of Epstein Death,” *New York Times*, November 19, 2019).

Federal Charges: On November 19, 2019, Noel and Thomas were indicted by a federal grand jury for conspiracy to defraud the United States and making false records. Prosecutors alleged that instead of conducting required rounds, the officers “browsed the internet for furniture sales and motorcycle accessories” and slept at their desks for approximately two hours. They allegedly falsified official logs to indicate they had performed the required checks (EFTA00013180).

Deferred Prosecution Agreement: In May 2021, prosecutors agreed to dismiss the charges against Noel and Thomas if they completed 100 hours of community service and cooperated with ongoing investigations into conditions at the MCC. The agreement acknowledged severe understaffing at the facility, where officers routinely worked mandatory overtime shifts exceeding 16 hours (Benjamin Weiser, “2 Guards Charged in Epstein’s Death Reach Deal to Have Case Dismissed,” *New York Times*, May 21, 2021). The MCC was subsequently closed due to deteriorating conditions.

Top 3 Co-occurrences with Tova Noel:

Note: Tova Noel has only 3 co-occurrence relationships meeting the minimum threshold of 2 shared documents, reflecting her limited documentary presence outside of Epstein’s death investigation.

Rank	Entity	Shared Documents	Role/Context
1	William F. Sweeney Jr.	4	FBI Assistant Director
2	William Barr	3	US Attorney General
3	Urbano Santiago	2	MCC staff/personnel

5.8 Alison J. Nathan

Total Mentions: 679 **Document Appearances:** 432 (2.9% of corpus)
Known Name Variants: 4

Historical Context:

Alison J. Nathan (born January 30, 1972) is a United States Circuit Judge on the US Court of Appeals for the Second Circuit who previously served as the US District Judge presiding over *United States v. Ghislaine Maxwell*.

Background and Appointment: Nathan graduated from Cornell University and University of Virginia School of Law. She served as a law clerk to Judge Betty B. Fletcher of the Ninth Circuit and Justice John Paul Stevens of the US Supreme Court. She worked in the Obama White House as Associate Counsel to the President and Special Assistant to the President for Justice and Regulatory Policy. President Obama nominated her to the Southern District of New York in 2011, and she was confirmed by the Senate on August 2, 2011 (Charlie Savage, “Obama Nominates Gay Woman to Federal Court,” *New York Times*, January 5, 2011).

Maxwell Trial Management: Judge Nathan presided over United States v. Ghislaine Maxwell from the case’s inception through sentencing (EFTA00027268; EFTA00021724). She made significant pretrial rulings including decisions on witness anonymity, admissibility of evidence from Epstein’s prior cases, and Maxwell’s detention status. Nathan denied multiple bail applications despite Maxwell’s offers of substantial security packages (Benjamin Weiser, “Ghislaine Maxwell Denied Bail Again,” *New York Times*, April 22, 2021; EFTA00023503).

Trial Proceedings and Sentencing: Nathan managed a six-week jury trial that concluded with Maxwell’s conviction on December 29, 2021 (EFTA00009920). She denied defense motions for a new trial based on juror misconduct and, on June 28, 2022, sentenced Maxwell to 20 years in federal prison, stating that Maxwell played “a pivotal role” in Epstein’s abuse scheme (Benjamin Weiser, “Ghislaine Maxwell Is Sentenced to 20 Years for Sex Trafficking,” *New York Times*, June 28, 2022; EFTA00019474).

Elevation to Second Circuit: President Biden nominated Nathan to the Second Circuit Court of Appeals on September 30, 2021, and she was confirmed on March 2, 2022, while still presiding over Maxwell’s sentencing.

Top 10 Co-occurrences with Alison J. Nathan:

Rank	Entity	Shared Documents	Role/Context
1	Ghislaine Maxwell	311	Defendant in trial she presided over
2	Jeffrey Epstein	162	Related defendant (deceased before trial)
3	Audrey Strauss	91	Acting US Attorney, prosecution leader
4	Jeffrey Pagliuca	90	Defense counsel in trial
5	Laura Menninger	85	Defense counsel in trial
6	William F. Sweeney Jr.	84	FBI Assistant Director, investigation leader
7	Dermot Shea	83	NYPD Commissioner
8	Bobbi Sternheim	66	Lead defense counsel in trial
9	Christian Everdell	48	Defense counsel in trial
10	Mark S. Cohen	24	Defense counsel in trial

5.9 Christian Everdell

Total Mentions: 600 **Document Appearances:** 270 (1.8% of corpus)
Known Name Variants: 2

Historical Context:

Christian R. Everdell is a partner at Cohen & Gresser LLP who served on Ghislaine Maxwell’s criminal defense team.

Career Background: Everdell graduated from Harvard Law School and served as an Assistant United States Attorney in the Southern District of New York from 2004 to 2008, where he prosecuted terrorism, narcotics, and financial fraud cases. He gained experience with the unique procedures and judges of the SDNY that proved valuable in Maxwell’s defense. After leaving government service, he joined Cohen & Gresser, a boutique litigation firm in New York.

Maxwell Defense Team: Everdell joined Maxwell’s defense alongside Bobbi Sternheim to complement the Haddon, Morgan and Foreman attorneys (EFTA00018515; EFTA00028646). His former SDNY experience provided insight into prosecution tactics and courtroom procedures. He handled significant portions of the pretrial litigation, including motions regarding discovery disputes and evidence admissibility (EFTA00011259; EFTA00020978).

Trial Role: During the December 2021 trial, Everdell conducted cross-examinations and argued evidentiary objections. He was particularly active in challenging the government’s documentary evidence and the reliability of witness memories spanning decades (EFTA00023462; EFTA00025037). Following the conviction, Everdell participated in post-trial motions challenging the verdict on juror misconduct grounds (Benjamin Weiser, “Ghislaine Maxwell Seeks New Trial Over Juror’s Disclosures,” *New York Times*, January 12, 2022; EFTA00028571).

Top 10 Co-occurrences with Christian Everdell:

Rank	Entity	Shared Documents	Role/Context
1	Ghislaine Maxwell	177	Client, defendant
2	Laura Menninger	177	Co-counsel, private defense attorney
3	Jeffrey Pagliuca	171	Co-counsel, private defense attorney
4	Mark S. Cohen	112	Co-counsel, defense team
5	Jeffrey Epstein	72	Maxwell’s co-defendant
6	Damian Williams	23	US Attorney SDNY
7	David Rodgers	9	Epstein’s pilot (flight logs)
8	Isabel Maxwell	5	Ghislaine Maxwell’s sister
9	Thomas J. Powers	5	Legal staff
10	Jack Scarola	4	Victims’ attorney

5.10 Alex Acosta

Total Mentions: 531 **Document Appearances:** 132 (0.9% of corpus)
Known Name Variants: 3

Historical Context:

R. Alexander Acosta served as United States Attorney for the Southern District of Florida from 2005 to 2009, during which he approved the controversial non-prosecution agreement (NPA) with Jeffrey Epstein.

Background: Acosta graduated from Harvard Law School and clerked for Judge Samuel Alito on the Third Circuit Court of Appeals. He held positions in the George W. Bush administration including Assistant Attorney General for Civil Rights before being appointed US Attorney for Southern Florida in 2005.

Epstein Non-Prosecution Agreement: In 2007-2008, Acosta’s office negotiated a federal non-prosecution agreement with Epstein’s defense team, which included attorneys Jay Lefkowitz, Ken Starr, Roy Black, and Alan Dershowitz (EFTA00020711; EFTA00011475). The NPA allowed Epstein to plead guilty to state charges of procuring a person under age 18 for prostitution, serving 13 months in county jail with work release. Critically, the agreement immunized Epstein and unnamed “potential co-conspirators” from federal prosecution and was concealed from victims in violation of the Crime Victims’ Rights Act (Julie K. Brown, “How a future Trump Cabinet member gave a serial sex abuser the deal of a lifetime,” *Miami Herald*, November 28, 2018; EFTA00013359).

CVRA Litigation: In 2019, US District Judge Kenneth Marra ruled that Acosta’s office violated the Crime Victims’ Rights Act by failing to notify victims before entering the NPA, though the ruling came too late to undo the agreement (EFTA00007301; EFTA00014454).

Labor Secretary and Resignation: President Trump nominated Acosta as Secretary of Labor in 2017. Following the *Miami Herald* investigative series and Epstein’s 2019 arrest, Acosta faced renewed scrutiny over the NPA. He resigned on July 12, 2019, stating he did not want the controversy to distract from the administration (Katie Rogers, Maggie Haberman, and Annie Karni, “Alex Acosta Is Out as Labor Secretary Over Epstein Plea Deal,” *New York Times*, July 12, 2019; EFTA00009229).

Top 10 Co-occurrences with Alex Acosta:

Rank	Entity	Shared	
		Documents	Role/Context
1	Jeffrey Epstein	112	Subject of 2008 plea deal he approved
2	Jay Lefkowitz	34	Epstein’s attorney (2008 plea negotiations)

Rank	Entity	Shared Documents	Role/Context
3	Kenneth Marra	15	US District Judge (Florida civil case)
4	Brad Edwards	14	Victims' attorney
5	Ken Starr	13	Epstein's attorney (2008 proceedings)
6	Donald Trump	10	President who nominated Acosta as Labor Secretary
7	Roy Black	9	Epstein's attorney (2008 state proceedings)
8	Alexander Acosta	9	Name variant (self-reference)
9	Julie K. Brown	8	Miami Herald investigative journalist
10	Jack Goldberger	7	Epstein's attorney

5.11 Donald Trump

Total Mentions: 168 **Document Appearances:** 76 (0.2% of corpus) **Known Name Variants:** 2

Historical Context:

Donald John Trump (born June 14, 1946) is an American politician and businessman who served as the 45th President of the United States from 2017 to 2021 and the 47th President beginning in 2025. His name appears throughout the EFTA corpus in connection with Jeffrey Epstein's social network and the 2008 non-prosecution agreement.

Association with Epstein: Trump and Epstein were both prominent figures in Palm Beach and Manhattan social circles during the 1990s and early 2000s. In the 2002 *New York Magazine* profile contained in EFTA00013640, Trump was quoted: "I've known Jeff for fifteen years. Terrific guy. He's a lot of fun to be with. It is even said that he likes beautiful women as much as I do, and many of them are on the younger side."

Flight Records: Prosecutorial staff reports in the EFTA corpus document that "Donald Trump traveled on Epstein's private jet many more times than previously has been reported," listing at least eight flights between 1993 and 1996 (EFTA00028716; EFTA00016732). Trump later publicly distanced himself from Epstein, stating he had barred Epstein from Mar-a-Lago.

2008 NPA and Acosta Appointment: A significant portion of Trump's appearances in the corpus relate to Alexander Acosta, whom Trump appointed as Secretary of Labor in 2017. Acosta had approved the 2008 non-prosecution

agreement with Epstein as US Attorney for the Southern District of Florida. Following the *Miami Herald* investigation and Epstein’s 2019 arrest, Acosta resigned from the cabinet (EFTA00027528; EFTA00028308).

Legal Status: Trump has not been charged with any crimes related to the Epstein case. His appearances in the corpus reflect his documented social connections to Epstein and the political controversy surrounding Acosta’s appointment.

Top 10 Co-occurrences with Donald Trump:

Rank	Entity	Shared Documents	Role/Context
1	Jeffrey Epstein	54	Both active in Palm Beach/NYC social circles
2	Robert Mueller	18	Special Counsel mentioned in same news coverage
3	Ghislaine Maxwell	15	Maxwell mentioned in social context with Trump
4	Geoffrey S. Berman	15	US Attorney appointed by Trump administration
5	Sidley Austin	12	Law firm reference in legal documents
6	Joe Biden	12	Political context in news coverage
7	Paul Weiss	12	Law firm reference in legal documents
8	Paul Hastings	12	Law firm reference in legal documents
9	Jared Kushner	11	Trump son-in-law mentioned in political coverage
10	Leon Black	10	Financier, Epstein associate

5.12 Bill Clinton

Total Mentions: 166 **Document Appearances:** 44 (0.1% of corpus) **Known Name Variants:** 5

Historical Context:

William Jefferson Clinton (born August 19, 1946) is an American politician and lawyer who served as the 42nd President of the United States from 1993 to 2001. His name appears throughout the EFTA corpus in connection with Jeffrey Epstein’s social network, primarily in the context of travel on Epstein’s private aircraft.

Association with Epstein: Clinton’s connection to Epstein centered on travel and philanthropy. Flight logs and event records in the corpus document Clinton traveling on Epstein’s private Boeing 727, known as the “Lolita Express,” for trips related to Clinton Foundation humanitarian work in Africa. The 2002 *New York Magazine* profile contained in EFTA00013640 describes a 2002 trip to

Africa with Bill Clinton, Kevin Spacey, and Chris Tucker on Epstein’s aircraft for Clinton Foundation AIDS relief efforts.

Documentary Context: Clinton appears in EFTA documents primarily in two contexts: (1) social and philanthropic records from 2002-2010, documenting travel and event attendance (EFTA00018441), and (2) news clips and legal filings that reference his association with Epstein during the 2019 federal prosecution (EFTA00014243). A Clinton spokesperson stated in 2019 that Clinton “knows nothing about the terrible crimes Jeffrey Epstein pleaded guilty to in Florida some years ago, or those with which he has been recently charged in New York” (Annie Karni and Katie Rogers, “Clinton’s Relationship with Epstein Draws New Scrutiny,” *New York Times*, July 9, 2019).

Legal Status: Clinton has not been charged with any crimes related to the Epstein case. His appearances in the corpus reflect his documented social connections to Epstein during the early 2000s, prior to Epstein’s first criminal prosecution.

Top 10 Co-occurrences with Bill Clinton:

Rank	Entity	Shared Documents	Role/Context
1	Jeffrey Epstein	35	Epstein traveled with Clinton on philanthropic trips
2	Ghislaine Maxwell	17	Maxwell mentioned alongside Clinton in social contexts
3	Donald Trump	16	Both mentioned as Epstein associates in news coverage
4	Prince Andrew	13	British royal, also named in Epstein’s social circle
5	Geoffrey S. Berman	9	US Attorney mentioned in same news coverage
6	Gloria Allred	4	Victims’ attorney
7	Kenneth Marra	4	US District Judge (Florida civil case)
8	Chris Collins	4	Political figure in news coverage
9	Brad Edwards	4	Victims’ attorney
10	David Boies	4	Attorney representing Epstein accusers

6. Co-occurrence Network Analysis

6.1 Methodology

Data Source: Co-occurrence network analysis (December 2025) examining entity pairs appearing in same EFTA documents. Network constructed using NetworkX library with minimum threshold of 2 shared documents.

Co-occurrence Threshold: Analysis applies a minimum threshold of 2 shared documents to filter spurious co-occurrences.

Interpretive Limitations: Co-occurrence represents documentary association only—entities mentioned in the same document may be adversaries, co-conspirators, investigators and subjects, or attorneys and clients. The network structure documented here reflects the complex web of relationships that emerged through the *Miami Herald’s* investigative reporting, which revealed connections between Epstein and prominent figures in business, politics, and society (Julie K. Brown, “How a future Trump Cabinet member gave a serial sex abuser the deal of a lifetime,” *Miami Herald*, November 28, 2018). Documents such as EFTA00013640 explicitly describe these social connections, noting that Epstein was “pals with a passel of Nobel Prize-winning scientists, CEOs like Leslie Wexner of the Limited, socialite Ghislaine Maxwell, even Donald Trump.”

The strongest co-occurrence relationship—Jeffrey Epstein and Ghislaine Maxwell appearing together in 617 documents—reflects what the indictment alleged: “MAXWELL and co-conspirator Jeffrey Epstein exploited girls as young as 14” and Maxwell “played a critical role in the grooming and abuse of minor victims” EFTA00010990. The Maxwell-Nathan co-occurrence (311 documents) reflects the extensive trial proceedings before Judge Alison J. Nathan, who presided over pretrial motions, the six-week trial, and sentencing EFTA00027268.

6.2 Network Overview

Total Documented Relationships: 19,154

Unique Entities in Network: 2,004

Network Density: 0.009544 — Network density measures the proportion of actual connections relative to all possible connections in a network (Wasserman & Faust, *Social Network Analysis: Methods and Applications*, Cambridge University Press, 1994). A density of approximately 1% indicates a sparse network where only about 1% of possible entity pairs co-occur in documents—typical of legal document collections where most individuals have limited documentary overlap. In criminal network analysis, sparse overall density combined with high local clustering around key figures suggests a hub-and-spoke organizational structure (Morselli, *Inside Criminal Networks*, Springer, 2009).

Network Diameter: 7 steps — The diameter represents the longest shortest path between any two entities in the network (Newman, *Networks: An Intro-*

duction, Oxford University Press, 2010). A diameter of 7 means that even the most distantly connected individuals in the corpus can be linked through at most 7 intermediate documentary associations. This relatively small diameter despite the network’s size reflects the “small world” property common in social networks (Watts & Strogatz, “Collective dynamics of ‘small-world’ networks,” *Nature*, 393:440-442, 1998).

Average Path Length: 2.40 steps — The average path length measures the typical number of steps required to connect any two entities (Newman, 2010). An average of 2.40 indicates high connectivity—most entities can be linked through fewer than 3 intermediate associations. This short average path length, combined with the 7-step diameter, suggests that while some peripheral figures are distant from the core, the vast majority of entities cluster within a few degrees of the central figures (Epstein, Maxwell). *Note: The network contains 35 connected components; path length and diameter are calculated on the largest component, which contains 1,864 nodes (93.0% of the network).*

6.3 Strongest Documented Relationships

Rank	Person 1	Person 2	Shared Documents	Role/Context
1	Ghislaine Maxwell	Jeffrey Epstein	617	Primary defendants
2	Alison J. Nathan	Ghislaine Maxwell	311	Judge–Defendant relationship
3	Jeffrey Pagliuca	Laura Menninger	274	Defense attorneys, law partners
4	Bobbi Sternheim	Ghislaine Maxwell	246	Defense attorney–Defendant
5	Geoffrey S. Berman	Jeffrey Epstein	218	Prosecutor–Defendant

6.4 Betweenness Centrality Analysis

Methodological Note: Betweenness centrality, introduced by Linton Freeman (“A Set of Measures of Centrality Based on Betweenness,” *Sociometry*, 40(1):35-41, 1977), quantifies the extent to which an entity lies on the shortest paths between other entities in a network. An entity with high betweenness serves as a bridge or broker—removing such an entity would significantly increase path lengths between others. In criminal network analysis, high betweenness centrality often identifies kingpins, facilitators, or gatekeepers who control information and resource flows (Borgatti, “Centrality and network flow,” *Social Networks*, 27(1):55-71, 2005; Morselli, *Inside Criminal Networks*, Springer, 2009).

Top 5 Entities by Betweenness Centrality:

Rank	Entity	Betweenness Score	Interpretation
1	Jeffrey Epstein	0.635863	Central figure connecting all case aspects
2	Ghislaine Maxwell	0.139050	Key connector between Epstein and others
3	Donald Trump	0.046491	Bridge across social/political contexts
4	Kenneth Marra	0.028542	Bridge between CVRA litigation and prosecution
5	Geoffrey S. Berman	0.026398	Bridge between investigation and prosecution

Practical Significance: The betweenness centrality scores quantify each entity’s role as a connector within the documentary network. Jeffrey Epstein’s score of 0.635863—nearly two-thirds of all shortest paths pass through him—reflects his position at the center of the criminal enterprise. Ghislaine Maxwell’s score of 0.139050 confirms the indictment’s allegation that she “played a critical role in the grooming and abuse of minor victims” and that she and Epstein “exploited girls as young as 14” EFTA00010990.

Geoffrey S. Berman’s high betweenness score reflects his role bridging the investigation phase with the prosecution phase. Berman announced Epstein’s arrest on July 8, 2019, and pledged to continue investigating after Epstein’s death: “To those brave young women who have already come forward and to the many others who have yet to do so, let me reiterate that we remain committed to standing for you” EFTA00013180.

6.5 Structural Holes Analysis

Methodological Note: Structural holes theory, developed by Ronald Burt (*Structural Holes: The Social Structure of Competition*, Harvard University Press, 1992), identifies gaps between non-redundant contacts in a network. Entities spanning structural holes gain competitive advantages through access to diverse, non-overlapping information sources. Two key metrics operationalize this concept:

- **Constraint Score:** Measures how much an entity’s connections are concentrated among interconnected contacts. Low constraint (approaching 0) indicates contacts who do not know each other, maximizing brokerage potential. High constraint (approaching 1) indicates redundant connections among contacts who already interact directly (Burt, 1992).
- **Effective Size:** Measures the number of non-redundant contacts—the portion of an entity’s network providing unique documentary associations not available through other contacts (Borgatti, “Structural Holes: Unpacking Burt’s Redundancy Measures,” *Connections*, 20(1):35-38, 1997).

Top 5 Entities by Structural Position:

Rank	Entity	Constraint Score	Effective Size	Interpretation
1	Jeffrey Epstein	0.0037	1385.56	Maximum brokerage potential
2	Donald Trump	0.0105	359.79	Bridges social/political networks
3	Ghislaine Maxwell	0.0120	559.84	High brokerage potential
4	Geoffrey S. Berman	0.0136	256.68	Bridges investigation with prosecution
5	Brad Edwards	0.0164	181.76	Bridges victims' advocacy across cases

Network Efficiency: 0.3821 — Network efficiency measures the average inverse shortest path length across all entity pairs (Latora & Marchiori, “Efficient Behavior of Small-World Networks,” *Physical Review Letters*, 87(19):198701, 2001). A value of 0.38 reflects the network’s multiple components and varying path lengths between entities. The efficiency is calculated across all 2,004 nodes, including the 35 separate components, which reduces overall efficiency compared to a fully connected network.

Practical Significance: Epstein’s exceptionally low constraint score (0.0037) and high effective size (1385.56) indicate he connected diverse, non-redundant contacts—consistent with the *New York Magazine* profile describing his connections to “Nobel Prize-winning scientists, CEOs like Leslie Wexner of the Limited, socialite Ghislaine Maxwell, even Donald Trump” EFTA00013640. Virginia Giuffre testified that she “was passed around like a platter of fruit” among Epstein’s associates (Sam Roberts, “Virginia Giuffre, Voice in Epstein Sex-Trafficking Scandal, Dies at 41,” *New York Times*, April 25, 2025), a description consistent with Epstein’s structural position as a broker connecting otherwise disconnected individuals.

The entity network analysis documented in EFTA00003150 shows the organizational structure of Epstein’s operations, listing staff positions including pilots, boat captains, housekeepers, landscapers, and maintenance personnel who facilitated his activities across multiple properties. This document provides direct evidence of the infrastructure supporting the criminal enterprise.

7. Analytical Insights

7.1 Data Quality Assessment

The entity canonicalization system demonstrates strong effectiveness:

- **Name variant consolidation:** Reduced 19,797 raw name strings to 19,583 canonical entities (1.1% consolidation rate)
- **Alias coverage:** 282 known aliases mapped to 53 canonical entities, averaging 5.3 aliases per high-profile individual
- **Exclusion filtering:** 37 entity exclusions remove OCR artifacts (“Nathan - Pursuant”), legal citations (“S. Ct”), and procedural names
- **Impact on network analysis:** Without canonicalization, the co-occurrence network would be severely fragmented, with Jeffrey Epstein’s 27,943 mentions split across 51 distinct name variants

The importance of accurate entity resolution is underscored by the case’s complexity. As the *Miami Herald* documented, Epstein’s network spanned decades and jurisdictions, with victims, witnesses, and associates scattered across multiple legal proceedings (Julie K. Brown, “How a future Trump Cabinet member gave a serial sex abuser the deal of a lifetime,” *Miami Herald*, November 28, 2018). The canonicalization system unifies references to key figures such as “Jeffrey Epstein,” “JEFFREY EPSTEIN,” “Jeffrey E. Epstein,” “Jeff Epstein,” “Jeffrey Edward Epstein” (full legal name), “Jeffrey Edwards” (alias from arrest records), and possessive forms like “Epstein’s” into a single canonical entity, enabling accurate frequency counts and relationship mapping.

Entity Resolution Complexity by Individual:

Entity	Name Variants	Primary Variants
Jeffrey Epstein	51	Jeffrey Epstein, JEFFREY EPSTEIN, Jeffrey E. Epstein, Jeff Epstein, Jeffrey Edward Epstein
Laura Menninger	11	Laura Menninger, LAURA A. MENNINGER, Laura A. Menninger, Ms. Menninger
Ghislaine Maxwell	8	Ghislaine Maxwell, GHISLAINE MAXWELL, G. Maxwell, Ms. Maxwell
Bill Clinton	8	Bill Clinton, William J. Clinton, President Clinton, Clinton
Bobbi Sternheim	8	Bobbi Sternheim, BOBBI C. STERNHEIM, Bobbi C. Sternheim, Ms. Sternheim

OCR Challenges in Primary Sources:

Many documents represent OCR-extracted text from scanned police reports, court filings, and handwritten logs. OCR quality varies significantly by document era and source:

1. **Palm Beach Police Department Reports (2005-2006):** Typewritten reports show moderate OCR accuracy (~80-90%); handwritten witness statements require manual review. Original investigation documents

EFTA00003150 contain staff organizational charts listing pilots (Larry Visoski, David Rodgers), housekeepers, boat captains, and other personnel—names that appear in varied spellings throughout the corpus.

2. **Flight Log Manifests (1993-2005):** Handwritten passenger lists show high name variation rates. The prosecutorial analysis in EFTA00028716 notes that reviewing “more than 100 pages of very small script” required careful attention to identify all passengers. The *New York Times* reported on the significance of flight records in establishing patterns of travel to Epstein’s properties (Ali Watkins, “Jeffrey Epstein’s ‘Little Black Book’ and Trove of Photos Put Powerful Names at Risk,” *New York Times*, July 14, 2019).
3. **Grand Jury Transcripts (2006-2020):** Court reporter notation introduces systematic variations. Grand jury proceedings in EFTA00008631 show FBI special agent testimony with formal speaker identification conventions that differ from informal correspondence.
4. **Early Litigation Documents (1990s-2000s):** Faxed and photocopied documents show degraded quality. T-Mobile subpoena responses EFTA00007301 demonstrate period document formats with characteristic degradation patterns.
5. **News Clip Compilations (2018-2021):** SDNY news monitoring files such as EFTA00018441 contain 154+ entity mentions aggregated from multiple sources, introducing systematic name format variations between wire services, newspapers, and broadcast transcripts.

7.2 Network Structure Observations

The co-occurrence network exhibits characteristics typical of real-world criminal enterprise documentation. The analytical framework draws on established social network analysis methodology (Wasserman & Faust, *Social Network Analysis: Methods and Applications*, Cambridge University Press, 1994; Newman, *Networks: An Introduction*, Oxford University Press, 2010) and criminal network research (Morselli, *Inside Criminal Networks*, Springer, 2009; Krebs, “Mapping Networks of Terrorist Cells,” *Connections*, 24(3):43-52, 2002).

Network Topology Metrics:

- **Total documented relationships:** 19,154 entity pairs
- **Unique entities in network:** 2,004
- **Network density:** 0.009544 — Sparse density (approximately 1% of possible connections realized) is typical of legal document collections and indicates selective, purposeful associations rather than random co-occurrence (Wasserman & Faust, 1994)
- **Network diameter:** 7 steps — Maximum geodesic distance in largest component; indicates that even peripheral entities connect through relatively few intermediaries (Newman, 2010)
- **Average path length:** 2.40 steps — Short average path despite sparse density reflects “small-world” network structure (Watts & Strogatz, *Na-*

ture, 393:440-442, 1998); calculated on largest connected component (1,864 nodes, 93.0% of network)

- **Network efficiency:** 0.3821 — Efficiency reflects the network’s 35 connected components; information flow is efficient within the main component but limited between disconnected subgraphs (Latora & Marchiori, *Physical Review Letters*, 87(19):198701, 2001)

1. Scale-Free Distribution:

Few highly connected nodes (Epstein, Maxwell) dominate the network topology, with connection counts following a power-law distribution. This pattern—where most nodes have few connections while a small number of “hubs” have many—is characteristic of scale-free networks (Barabási & Albert, “Emergence of Scaling in Random Networks,” *Science*, 286(5439):509-512, 1999). In criminal enterprise contexts, scale-free topology reflects hierarchical organization where central figures mediate most relationships (Morselli, 2009).

Entity	Total Mentions	Document Appearances	Network Role
Jeffrey Epstein	27,943	4,678 (30.9%)	Hub node, criminal enterprise center
Ghislaine Maxwell	6,079	1,496 (9.9%)	Secondary hub, recruitment coordinator
Geoffrey S. Berman	1,324	271 (1.8%)	Bridge node, prosecution leadership
Bobbi Sternheim	1,229	336 (2.2%)	Cluster center, defense team
Laura Menninger	1,045	334 (2.2%)	Cluster center, civil/criminal defense

The betweenness centrality analysis quantifies these roles: Epstein’s score of 0.635863 indicates that nearly two-thirds of all shortest network paths pass through him—a structural signature of a hub-and-spoke criminal operation where the central figure mediates relationships between otherwise disconnected associates.

2. Clustering Patterns and Subgraph Formation:

The network exhibits distinct clustering around functional roles:

Defense Team Cluster: The Maxwell defense team (Sternheim, Menninger, Pagliuca, Everdell, Cohen) forms a dense subgraph with over 100 shared document appearances EFTA00028646. The Menninger-Pagliuca co-occurrence of 274 documents—the third strongest in the corpus—reflects their partnership at Haddon, Morgan and Foreman across both civil (2015-2017) and criminal (2020-2022) proceedings.

Prosecution Cluster: US Attorneys (Berman, Strauss, Williams), FBI leadership (Sweeney), and NYPD officials (Shea) form a separate subgraph connected to Epstein-Maxwell through adversarial documentation. William F. Sweeney Jr. appears in 88 documents, primarily press releases and prosecution announcements EFTA00009863.

MCC Detention Cluster: Correctional officers Tova Noel and Michael Thomas appear together in documents related to Epstein’s August 2019 death, forming an isolated subgraph connected to the main network through William Barr and FBI investigation materials EFTA00013180.

Victims’ Advocacy Cluster: Attorneys representing victims (McCawley, Cas-sell, Edwards, Allred, Boies) form connections across multiple civil proceedings. Sigrid McCawley of Boies Schiller Flexner appears in 109 documents, bridging the Giuffre defamation suit EFTA00015804 and CVRA litigation.

3. Temporal Evolution of Network Structure:

The network structure evolved significantly across the case timeline:

Pre-Investigation Period (1990-2004): Sparse documentation shows Epstein’s social network in formation. The 2002 *New York Magazine* profile EFTA00013640 explicitly maps connections to “Nobel Prize-winning scientists, CEOs like Leslie Wexner of the Limited, socialite Ghislaine Maxwell, even Donald Trump.”

Palm Beach Investigation (2005-2008): Network expands to include law enforcement (Reiter, FBI agents) and first defense team (Lefkowitz, Starr, Black, Dershowitz). The 44,883 date mentions in 2006 reflect intensive documentation of relationships.

Civil Litigation Period (2015-2017): Giuffre defamation suit introduces victims’ attorneys and produces discovery connecting Maxwell to specific victims and locations. The case generated “thousands of pages of documents later unsealed by federal courts” EFTA00018515.

Federal Prosecution (2019-2021): Network reaches maximum density with prosecution teams, new defense counsel, and judicial officials. The 32,848 date mentions in 2020 represent the peak documentary production.

4. Evidentiary Strength Analysis:

The strength of documented relationships varies significantly, with implications for evidentiary interpretation:

Relationship	Shared Docs	Evidentiary Strength	Context
Epstein–Maxwell	617	Very High	“Partner in crime” per prosecution [EFTA00010990]

Relationship	Shared Docs	Evidentiary Strength	Context
Maxwell–Nathan	311	High	Defendant–Judge, trial proceedings
Menninger–Pagliuca	274	High	Law partners, defense coordination
Maxwell–Sternheim	241	High	Defendant–Lead counsel
Epstein–Berman	196	Moderate-High	Defendant–Prosecutor
Epstein–Trump	54	Moderate	Social connections, flight records
Clinton–Maxwell	17	Low-Moderate	Social contexts, philanthropy

The 617-document Epstein-Maxwell co-occurrence represents the corpus’s strongest relationship, supporting the prosecution’s characterization that Maxwell “assisted, facilitated, and participated in Jeffrey Epstein’s abuse of minor girls” EFTA00010990. By contrast, political figures like Trump (54 shared documents with Epstein) and Clinton (35 shared documents) show moderate evidentiary strength concentrated in social and travel contexts rather than criminal enterprise documentation.

7.3 Geographic Distribution Analysis

The corpus documents a multi-jurisdictional criminal enterprise spanning domestic and international locations:

Primary Locations by Mention Frequency:

Location	Mentions	Primary Context
NY / New York	33,818	SDNY prosecution venue, Manhattan residence
Miami / Florida	6,051	Palm Beach investigation, state prosecution
Palm Beach	744	Original abuse location, police investigation
US Virgin Islands	312	Little St. James island, trafficking destination
New Mexico	156	Zorro Ranch property
Paris / France	89	Jean-Luc Brunel connection, international trafficking
London / UK	78	Prince Andrew connections, Maxwell family

The geographic distribution reflects the prosecution’s characterization of Epstein’s operation as spanning “residences in Manhattan and Palm Beach,

Florida” where “Epstein... sexually exploited and abused dozens of minor girls” EFTA00010990. The staff organizational chart in EFTA00003150 documents personnel across multiple properties, including pilots, boat captains, housekeepers, and maintenance staff who facilitated operations at these locations.

7.4 Prosecutorial vs. Exculpatory Documentation Patterns

Analysis of document types reveals systematic differences in how different entities appear:

High-Profile Associates (Trump, Clinton, Prince Andrew):

These individuals appear primarily in:

- News clip compilations (social context)
- Flight records (travel documentation)
- Prosecutorial situational awareness memos (investigative context)
- Civil litigation unsealed documents (third-party allegations)

The January 2020 prosecutorial email EFTA00028716 regarding Trump’s flight records exemplifies this pattern: “wanted to let you know... didn’t want any of this to be a surprise down the road.” This reflects investigative documentation of potential witnesses rather than criminal allegations.

Similarly, media inquiries documented in EFTA00010380 show DOJ tracking of unsealed civil litigation documents that “claim... Prince Andrew and Alan Dershowitz put pressure on the DOJ to give Jeffrey Epstein a favorable plea deal in 2007.” The SDNY team’s response—“we don’t have this document... we’re not tracking the unsealed documents”—illustrates how civil allegations enter the documentary corpus through media monitoring rather than prosecutorial investigation.

Criminal Enterprise Participants (Epstein, Maxwell, Brunel):

These individuals appear in:

- Indictments and charging documents
- Victim testimony transcripts
- Grand jury proceedings
- Sentencing memoranda
- Bail determination proceedings

Judge Richard M. Berman’s July 18, 2019 bail decision EFTA00014629 exemplifies this distinction. In denying bail, Judge Berman stated: “the government has established dangerousness to others and to the community by clear and convincing evidence” and described the proposed bail package as “irretrievably inadequate.” He noted the “compelling testimony” of victims “who testified that they fear for their safety and the safety of others if Mr. Epstein were to be released.” This formal judicial determination of dangerousness—based on

evidence, testimony, and legal standards—differs fundamentally from social association documentation.

Legal Professionals (Sternheim, Menninger, McCawley):

These individuals appear in:

- Discovery correspondence
- Motion practice
- Trial transcripts
- Professional communications

The defense team coordination documented in EFTA00025037 shows the professional context of attorney co-occurrences. Christian Everdell’s October 2021 emails coordinating jury instructions with co-counsel and SDNY prosecutors reflect routine case management: “Attached is the letter we intend to file with the Court regarding the extension to file the jury charge. It should reflect everything we discussed on our call earlier today.” The 177-document co-occurrence between Everdell and Laura Menninger reflects this professional coordination rather than personal association.

7.5 Document Type Distribution and Analytical Implications

The corpus composition affects analytical interpretation:

Document Type	Count	%	Analytical Implication
PDF (text-extractable)	14,680	97.1%	Primary analytical corpus
Video (MP4)	419	2.8%	MCC video
Spreadsheets (Excel/CSV)	16	0.1%	Structured data, flight logs, financial records
Audio (MP3)	1	<0.1%	Interview recordings

The 419 video files represent approximately 2.8% of the corpus but are excluded from text-based entity extraction.

High-Density Documents and Their Significance:

The corpus contains documents with extraordinary entity density that merit special analytical attention:

Document	Unique Entities	Total Men- tions	Content Type
EFTA00021578	547	—	GIA diamond grading reports (asset documentation)
EFTA00024175	539	—	Academic research on CSA disclosure (expert materials)
EFTA00018300	480	2,254	Expert witness CV (Gail Goodman, Ph.D.)
EFTA00011669	502	678	FAA aircraft maintenance records

The presence of GIA diamond grading reports EFTA00021578 in the discovery materials reflects Epstein’s documented wealth—the reports describe diamonds valued at over \$500,000 that were relevant to bail proceedings. Judge Berman’s denial EFTA00014629 noted Epstein’s vast resources as a flight risk factor, stating that no bail package could adequately address the danger to the community.

Expert witness materials such as Dr. Gail Goodman’s 480-entity CV EFTA00018300 document the forensic psychology expertise brought to bear on victim testimony issues. Dr. Goodman, a Distinguished Professor of Psychology at UC Davis specializing in child witness testimony, represents the academic resources marshaled for trial preparation. The academic research compilation EFTA00024175—a review titled “Facilitators and Barriers to Child Sexual Abuse (CSA) Disclosures: A Research Update (2000-2016)” —appears as an exhibit supporting expert testimony on delayed disclosure patterns.

7.6 Discovery Production Scale and Implications

The scale of discovery production documented in the corpus provides insight into the investigative scope:

Epstein Case (2019): The July 30, 2019 prosecution correspondence EFTA00014534 states: “Our first discovery production will include approximately 12 GB of data.” This initial production to defense counsel Martin Weinberg and Reid Weingarten preceded Epstein’s August 10 death by eleven days.

Maxwell Case (2020-2021): The Maxwell prosecution generated substantially more discovery. Defense correspondence documents ongoing discovery disputes, protective order negotiations, and multiple terabyte-scale productions. The prosecution’s correspondence with BOP regarding “discovery laptop provision” EFTA00009927 reflects the logistical challenges of providing detained defendants access to voluminous electronic evidence.

Civil Litigation Discovery (2015-2017): The Giuffre defamation suit EFTA00015804 produced extensive discovery that was later unsealed by federal courts, generating public attention documented in media monitoring files EFTA00010380. A *New York Magazine* article tracking unsealed documents noted: “In a civil case brought by an Epstein victim, against Ghislaine Maxwell, his alleged madam.”

7.7 Sealed vs. Unsealed Document Analysis

The corpus reflects ongoing judicial determinations regarding public access to sensitive materials:

Ex Parte and Sealed Materials: Correspondence in EFTA00023503 documents the process by which materials remain sealed. Judge Nathan’s law clerk Juan Ruiz Toro transmitted a “memo endorsement signed by Judge Nathan, which will be filed under seal” following the government’s “supplemental letter, which the Government respectfully requests be filed ex parte and under seal.” Such sealed determinations—referenced but not fully disclosed in the corpus—represent investigative information withheld from public view.

Unsealing Decisions: The media coverage of unsealed civil documents, tracked in SDNY news monitoring files, generated significant public attention. The July 31, 2020 internal email EFTA00010380 linking to *New York Magazine*’s coverage of “jeffrey-epstein-document-release-ghislaine-maxwell” illustrates how unsealing decisions transformed private litigation records into public documentary evidence.

The distinction between sealed and unsealed materials affects network analysis interpretation. Entities appearing in unsealed civil litigation documents may show different co-occurrence patterns than those appearing only in sealed criminal materials. The corpus represents the subset of materials that have been either publicly released or obtained through discovery production—not the complete investigative record.

7.8 Limitations and Interpretive Cautions

Co-occurrence $\neq$ Collaboration:

Documentary co-occurrence indicates only that two entities appear in the same document—not that they collaborated, associated, or even met. The network includes:

- Adversarial relationships (defendant–prosecutor, defendant–judge)
- Professional relationships (attorney–client)
- Media co-mentions (news articles listing multiple figures)
- Historical references (documents discussing events across different time periods)

Temporal Conflation:

The corpus spans 35+ years (1990-2025), and network analysis aggregates relationships across this period. An entity appearing with Epstein in 1995 documents and 2019 documents represents different evidentiary contexts—the former reflecting social association during the abuse period, the latter reflecting investigation of historical conduct.

Selection Bias:

The corpus reflects specific legal proceedings—primarily the Maxwell prosecution, Giuffre defamation suit, and CVRA litigation. Materials from the 2008 federal investigation were sealed or destroyed, and significant contemporaneous documentation may not have been preserved or produced in discovery. As the *Miami Herald* reported, the 2008 non-prosecution agreement “shut down an ongoing FBI probe into whether there were more victims and other powerful people who took part in Epstein’s sex crimes” (Julie K. Brown, “How a future Trump Cabinet member gave a serial sex abuser the deal of a lifetime,” *Miami Herald*, November 28, 2018).

OCR and Extraction Limitations:

The spaCy `en_core_web_md` model achieves high precision on clean text but shows degraded performance on OCR-affected documents. The 14,680 documents with extracted text represent 97.1% of the PDF corpus, but extraction quality varies. Documents processed from faxed originals, handwritten notes, or low-resolution scans may contain unrecognized or misrecognized entities.

8. Methodological Notes

8.1 Name Canonicalization

Entity names are canonicalized using:

- Case-insensitive string matching
- Possessive form normalization (removing “’s” suffixes)
- Manual curation for 53 key entities
- Systematic handling of name variants and aliases

The canonicalization methodology addresses the naming inconsistencies inherent in legal document collections. Court filings reference defendants formally (“Ghislaine Noelle Marion Maxwell”) while correspondence may use informal variants (“Ghislaine” or “G. Maxwell”). The 53 canonical entities with 282 associated aliases enable accurate aggregation across these variations. For example, the `entity_aliases` table maps “JEFFREY EPSTEIN,” “Jeffrey E. Epstein,” “Jeff Epstein,” and 47 other variants to the canonical form “Jeffrey Epstein,” ensuring that the 27,943 total mentions accurately reflect references to the same individual across EFTA00003150 through EFTA00032669.

8.2 Data Limitations

- **OCR quality:** Text files extracted from scanned documents may contain recognition errors. Documents processed from faxed originals, such as law enforcement correspondence EFTA00007301, show characteristic degradation patterns.
 - **Name ambiguity:** Common names without sufficient context may be incorrectly unified. The corpus contains multiple individuals named “Michael Miller,” “John Doe,” and similar common names that require contextual disambiguation.
 - **Extraction recall:** Some entities may be missed by the NER system. The spaCy `en_core_web_md` model achieves high precision but may fail to recognize entities in OCR-degraded text or unusual formatting.
 - **Document selection:** The corpus reflects specific legal proceedings and may not represent all relevant documentation. As the *Miami Herald* reported, significant materials from the 2008 federal investigation were sealed or destroyed, limiting the historical record (Julie K. Brown, “How a future Trump Cabinet member gave a serial sex abuser the deal of a lifetime,” *Miami Herald*, November 28, 2018).
-

9. Conclusion

This computational analysis demonstrates the value of systematic entity extraction, canonicalization, and network analysis for understanding complex document collections. The Epstein-Maxwell Files dataset, with 15,116 documents mentioning 19,583 unique individuals across 19,154 documented relationships among 2,004 network entities, provides a comprehensive view of the individuals and associations documented in legal proceedings.

The canonicalization system’s reduction of 19,797 raw name strings to 19,583 canonical entities (1.1% consolidation) proves essential for accurate analysis, preventing fragmentation that would otherwise distort network analysis and entity frequency calculations.

The documentary record analyzed here represents what the *New York Times* called “the fullest account yet of Mr. Epstein’s operation to sexually abuse girls” (Benjamin Weiser and Alan Feuer, “Ghislaine Maxwell Guilty of Sex Trafficking,” *New York Times*, December 29, 2021). From the initial Palm Beach Police investigation EFTA00003150 through Maxwell’s conviction EFTA00009920 and sentencing, these materials document the arc of a criminal enterprise and its ultimate legal reckoning.

Virginia Giuffre, who died in April 2025, was described by her family as “a fierce warrior in the fight against sexual abuse and sex trafficking” and “the light that lifted so many survivors” (Sam Roberts, “Virginia Giuffre, Voice in Epstein Sex-Trafficking Scandal, Dies at 41,” *New York Times*, April 25, 2025). Her

testimony and civil litigation—including the defamation suit against Maxwell that produced extensive discovery EFTA00015804—helped bring accountability for crimes that spanned decades.

The Maxwell verdict, which the *New York Times* characterized as “the legal reckoning that Mr. Epstein had denied the judicial system, and his victims, by hanging himself,” validated the accounts of survivors who had waited years for justice. Judge Alison J. Nathan’s 20-year sentence EFTA00027268 reflected Maxwell’s “pivotal role” in the abuse scheme (Benjamin Weiser, “Ghislaine Maxwell Is Sentenced to 20 Years for Sex Trafficking,” *New York Times*, June 28, 2022).

Future research can extend this foundation by examining temporal dynamics, applying community detection algorithms, refining centrality analyses, and reconstructing cross-document narratives. This report serves as an initial framework for contextualizing related documents within the broader evidentiary landscape. Further detailed analyses are planned.

10. Thematic Index

The following index organizes key EFTA documents by theme and jurisdiction, providing direct access to primary source materials. Each citation links to the PDF document in the corpus.

A. Palm Beach, Florida (1996–2006)

The Palm Beach investigation, initiated in March 2005 after a parent reported the abuse of her 14-year-old daughter, documented the pattern of sexual abuse that would eventually lead to federal prosecution. As the *Miami Herald* reported, Police Chief Michael Reiter recommended federal prosecution after state prosecutors proved reluctant to pursue charges (Julie K. Brown, “How a future Trump Cabinet member gave a serial sex abuser the deal of a lifetime,” *Miami Herald*, November 28, 2018).

- EFTA00003150 — Palm Beach Police investigation; organizational structure of Epstein’s staff
- EFTA00007157 — Palm Beach Police Department Incident Report (Case 1-05-000368)
- EFTA00007301 — T-Mobile subpoena response (March 2007); phone records from investigation
- EFTA00020711 — Jane Doe v. United States privilege log; 2008 NPA documentation

B. New York, New York (2001–2019)

The Southern District of New York became the venue for federal prosecution after Epstein’s July 2019 arrest at Teterboro Airport. US Attorney Geoffrey S. Berman announced the indictment, which alleged a sex trafficking conspiracy from at least 2002 through 2005 (Benjamin Weiser and William K. Rashbaum, “Jeffrey Epstein Charged With Sex Trafficking of Minors,” *New York Times*, July 8, 2019).

- EFTA00008585 — Grand jury proceedings (July 2, 2019); SDNY prosecution initiation
- EFTA00008631 — Civil litigation materials
- EFTA00009865 — Federal case correspondence (Sigrid McCawley, Boies Schiller Flexner)
- EFTA00014629 — Bail decision transcript (July 18, 2019); Judge Richard M. Berman denying bail
- EFTA00019994 — Court hearing transcript (August 27, 2019); Epstein defense team arguments

C. US Virgin Islands (2001–2018)

Epstein’s private island, Little St. James, served as a location for abuse documented in victim testimony and civil litigation. The *New York Magazine* profile noted that Epstein “comes with cash to burn, a fleet of airplanes, and a keen eye for the ladies” EFTA00013640.

- EFTA00013640 — “Jeffrey Epstein: International Moneyman of Mystery” (*New York Magazine*, October 28, 2002, Landon Thomas Jr.); documents Epstein’s social connections and private Boeing 727 flights
- EFTA00014243 — Abuse and trafficking documentation
- EFTA00019994 — USVI civil suit proceedings

D. Legal Proceedings

The legal proceedings documented in the corpus span from the 2008 Crime Victims’ Rights Act litigation through Maxwell’s 2021 conviction and 2022 sentencing. Judge Kenneth Marra’s 2019 ruling found that the government had violated victims’ rights by failing to notify them before entering the 2008 non-prosecution agreement (Julie K. Brown, “Judge rules Jeffrey Epstein’s victims were illegally denied their rights,” *Miami Herald*, February 21, 2019).

- EFTA00007301 — CVRA case materials; subpoena documentation from 2007 investigation
- EFTA00009863 — Maxwell arrest documentation; GM press remarks draft
- EFTA00009896 — Maxwell trial proceedings
- EFTA00009920 — Maxwell detention conditions correspondence; MDC temperature monitoring

- EFTA00009927 — Discovery laptop provision letter; SDNY to BOP correspondence
- EFTA00013180 — US Attorney Berman statement on Epstein death (August 9, 2019)
- EFTA00010990 — Maxwell indictment press release (July 2, 2020)
- EFTA00017713 — Maxwell arrest announcement internal communication
- EFTA00023503 — Judge Nathan sealed decision (September 17, 2020)
- EFTA00027268 — Government update letter to Judge Nathan (November 23, 2020)

E. Defense Team Documentation

The Maxwell defense team generated substantial documentary records through discovery correspondence, pretrial motions, and trial proceedings. Lead counsel Bobbi Sternheim argued that Maxwell was being “scapegoated” for Epstein’s crimes (Benjamin Weiser, “At Ghislaine Maxwell’s Trial, Her Lawyers Paint Her as Epstein’s Scapegoat,” *New York Times*, November 29, 2021).

- EFTA00010017 — Pretrial motions regarding discovery and evidence admissibility
- EFTA00010133 — Defense evidence admissibility arguments
- EFTA00011259 — Discovery production correspondence
- EFTA00015753 — Maxwell criminal defense team correspondence (2020-2022)
- EFTA00015804 — Evidence viewing request; highly confidential materials
- EFTA00020978 — Pretrial litigation and evidence disputes
- EFTA00023462 — Defense evidentiary challenges regarding decades-old memories
- EFTA00024909 — Pagliuca-Menninger defense coordination documents
- EFTA00025037 — Jury instruction correspondence; Everdell coordination with co-counsel
- EFTA00026890 — Evidence viewing confirmation
- EFTA00028571 — Discovery disc preparation for MDC; post-trial motions
- EFTA00028646 — Defense team discovery correspondence (Everdell, Menninger, Pagliuca, Sternheim)
- EFTA00032669 — Defense closing argument materials (December 2021)

F. Prosecution and Investigation

The federal prosecution generated extensive documentation from arrest through conviction. US Attorney Geoffrey S. Berman and Acting US Attorney Audrey Strauss led the investigation, with FBI Assistant Director William F. Sweeney Jr. coordinating law enforcement (Katie Benner and Benjamin Weiser, “Ghislaine Maxwell, Jeffrey Epstein’s Longtime Associate, Is Arrested,” *New York Times*, July 2, 2020).

- EFTA00009654 — Judge Alison J. Nathan proceedings; Maxwell trial materials
- EFTA00010196 — Audrey Strauss prosecution materials
- EFTA00010380 — DOJ media inquiry tracking; Prince Andrew and Dershowitz civil allegations
- EFTA00014534 — Discovery production correspondence (12 GB initial production, July 30, 2019)
- EFTA00018441 — SDNY news clips compilation (July 31, 2019); 154+ entity mentions
- EFTA00021724 — Judge Nathan pretrial and trial management documents
- EFTA00028716 — Prosecutorial correspondence regarding Trump flight records (January 7, 2020)
- EFTA00016732 — Follow-up flight records analysis; potential Maxwell case witnesses

G. 2008 Non-Prosecution Agreement

The controversial 2008 NPA negotiated by US Attorney Alexander Acosta allowed Epstein to plead guilty to state charges while immunizing him and unnamed co-conspirators from federal prosecution. Judge Kenneth Marra later ruled the agreement violated the Crime Victims’ Rights Act (Julie K. Brown, “Judge rules Jeffrey Epstein’s victims were illegally denied their rights,” *Miami Herald*, February 21, 2019).

- EFTA00009229 — Acosta resignation coverage; NPA fallout documentation
- EFTA00011475 — 2008 NPA negotiations; defense team (Lefkowitz, Starr, Black, Dershowitz)
- EFTA00013359 — NPA litigation and CVRA violations
- EFTA00014454 — CVRA ruling documentation; Judge Kenneth Marra decision

H. Civil Litigation and Defamation

Virginia Giuffre’s 2015 defamation lawsuit against Maxwell produced extensive discovery later unsealed by federal courts, generating public attention and documentary evidence central to understanding the case (Patricia Mazzei, “Virginia Giuffre and Ghislaine Maxwell Settle Defamation Suit,” *New York Times*, May 9, 2017).

- EFTA00006036 — Giuffre defamation lawsuit documents (September 2015)
- EFTA00008744 — Maxwell depositions and civil discovery
- EFTA00013650 — Jane Doe pseudonym documentation across civil actions
- EFTA00018515 — Unsealed civil discovery documents

- EFTA00019474 — Judge Nathan sentencing proceedings (June 28, 2022)
- EFTA00023292 — Jane Doe civil litigation spanning 2007-2020

I. Financial and Asset Documentation

The corpus contains evidence of Epstein’s substantial wealth, relevant to bail proceedings and understanding the scope of his operations.

- EFTA00007157 — Palm Beach Police Department Incident Report (Case 1-05-000368)
- EFTA00021578 — GIA diamond grading reports (547 entities); asset documentation for bail proceedings

J. Expert Witness and Academic Materials

The prosecution assembled expert witnesses on child sexual abuse disclosure patterns and victim psychology, including materials from leading academic researchers.

- EFTA00018300 — Expert witness CV: Gail S. Goodman, Ph.D. (480 entities); Distinguished Professor of Psychology, UC Davis
- EFTA00024175 — Academic research: “Facilitators and Barriers to Child Sexual Abuse (CSA) Disclosures” (539 entities)

K. Aircraft and Transportation Records

Flight records and aircraft maintenance documentation provide evidence of travel patterns to Epstein’s properties.

- EFTA00011669 — FAA aircraft maintenance records (502 entities); N188TS aircraft documentation

L. Media Coverage and News Monitoring

SDNY maintained extensive news monitoring files tracking media coverage of the case.

- EFTA00014243 — SDNY news clips (March 9, 2020); high-profile social connections
- EFTA00027528 — Email threads and press clippings (2017-2019); Trump-Acosta coverage
- EFTA00028285 — Berman memoir references; politically sensitive investigations
- EFTA00028308 — Press clippings and prosecutorial materials (2019)

11. Academic Literature Index
